

# 3500 LB. DELUXE BALLSCREW SUPER HI-POWER JACK

- Deluxe Ball Screw
- Limit Switch Shutoff
- 2-1/4" Outer Post
- Emergency "Crank-Thru" Head
- Night Light
- 2 Year Warranty
- Built-In Level

ALSO AVAILABLE IN BLACK

The Hi-Power 3500 Jack includes all the features of Barker's popular VIP 3500 Jack plus it is equipped with a precision ball screw and limit switch shutoff. This low-friction design provides up to 25% less amperage draw and gives more life to virtually all components. The special limit switch provides a silent shut-off in place of torque limiter at end of travel.

Part No. 27452

THE **BEST** RV POWER JACK AVAILABLE FROM BARKER MFG.

## VIP JACKS

These VIP 12 volt trailer jacks have been designed to provide all the features RV owners desire at competitive prices unmatched by similar products.

Best of all, their top quality is the same you

have come to expect from any Barker product. When you open the carton you will notice your VIP Jack is enclosed in its own plastic wrapper. This provides added protection and shows how proud we are of the product that we made in Battle Creek, Michigan just a month or two ago.

The VIP 3000 Jack features a **full 18" stroke** while the VIP 3500 Jacks are available in **18" and 24" Stroke**. The 24" stroke model is perfect for toy haulers or high tow vehicles. All VIP jacks are sealed at the bottom of the inner tube to keep moisture and dirt from the precision screws and nuts. A special heavy-duty foot pad prevents "sink-in" in soft ground or asphalt.

Each VIP Jack is equipped with a **"waterproof"** up and down switch and an on/off switch that operates the **night light**. Just flip the switch and have convenient illumination when you hitch up or unhitch after dark, or if you need an aid to find that important item in the rear of your tow vehicle.

Don't worry if you can't find your level to set up your unit. Each of these jacks is equipped with a **patented built-in level** right where you need it – on top of the head so it is easy to see when you are raising or lowering your RV. A "crank-thru" feature (just turn off the level on the top of the head) permits you to use the emergency handle (included) to raise or lower your trailer if you have a battery failure.

VIP jacks are equipped with 10 gauge hook-up wire and an in-line fuse to meet RVIA standards.

All parts are aluminum, powder coated steel, plastic, and stainless steel for maximum rust resistance.

**A FULL TWO YEAR WARRANTY COVERS** workmanship and materials (see details in our installation and operating instructions included with each jack).

**Need a VIP jack for your cargo or stock trailer?** Check out our two special VIP jacks that include all the unique VIP features except are not equipped with built-in level.
