

WALL CAP

Please read and save these instructions. Read carefully before attempting to assemble, install, operate or maintain this product. Protect yourself and other by observing all safety information. Failure to comply with instructions could result in personal injury and/or property damage.

We recommend shutter not be mounted closer to the fan than 1/3 the diameter of fan blade.

Do not force shutter into opening!

Do not open shutter by lifting individual blades!

Do not install shutter leaning forward or backward!

Installation

1. Shutter frame should be mounted level and squarely on outside wall. Care should be taken not to twist the shutter frame. Never cover shutter with siding or masonry work. Shutter should be mounted so it can be removed any time in case of damage.
2. Shutter should operate as freely after installation as it did before.
3. Caulking compound is recommended between shutter frame edges and the wall.
4. Clean and lubricate shutter at the same time that the fan is lubricated and cleaned.
