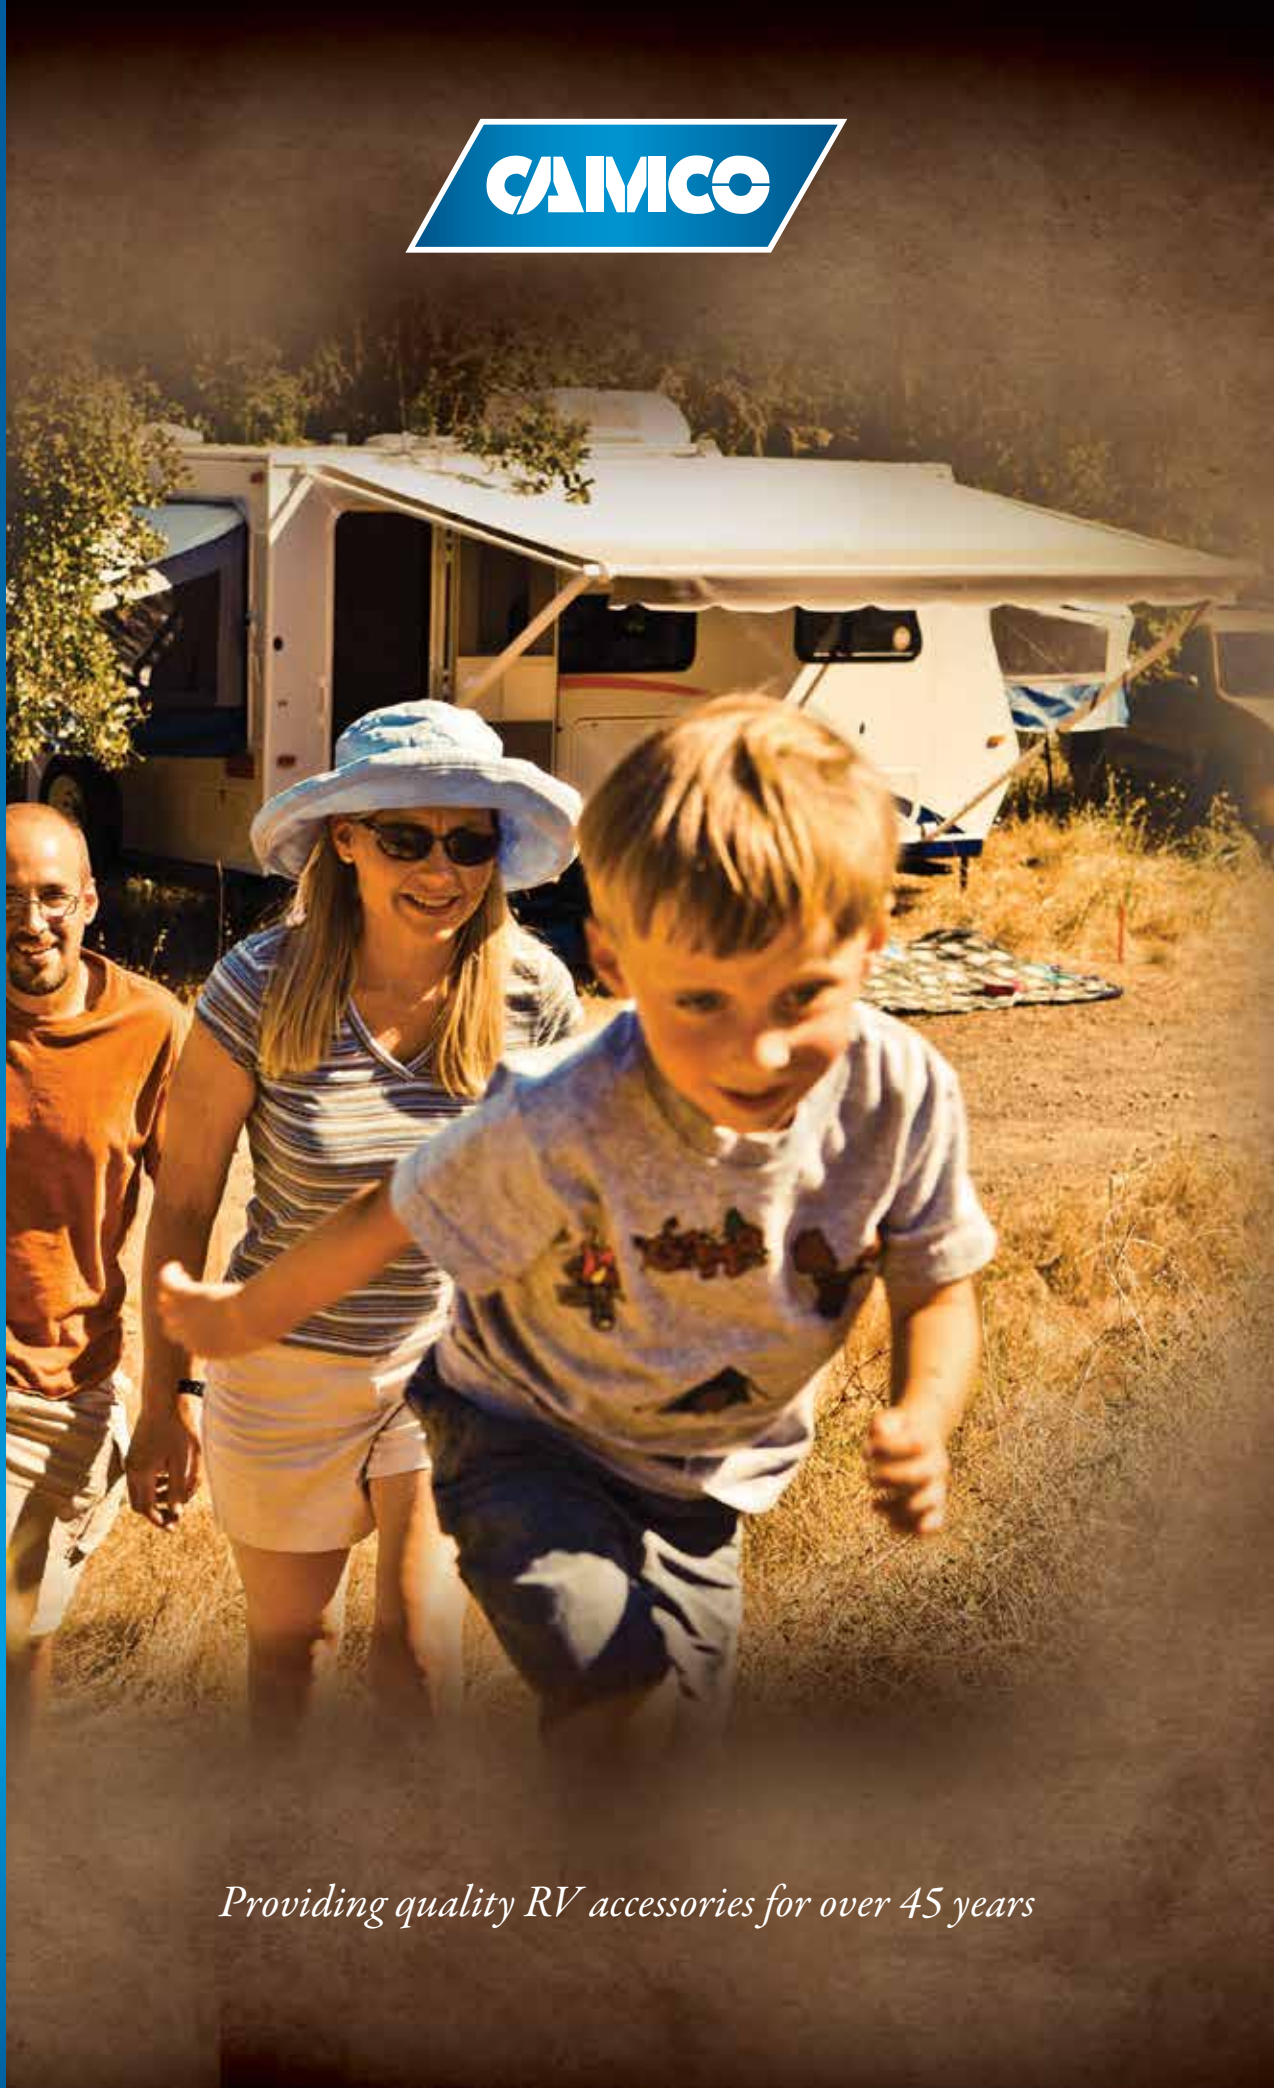
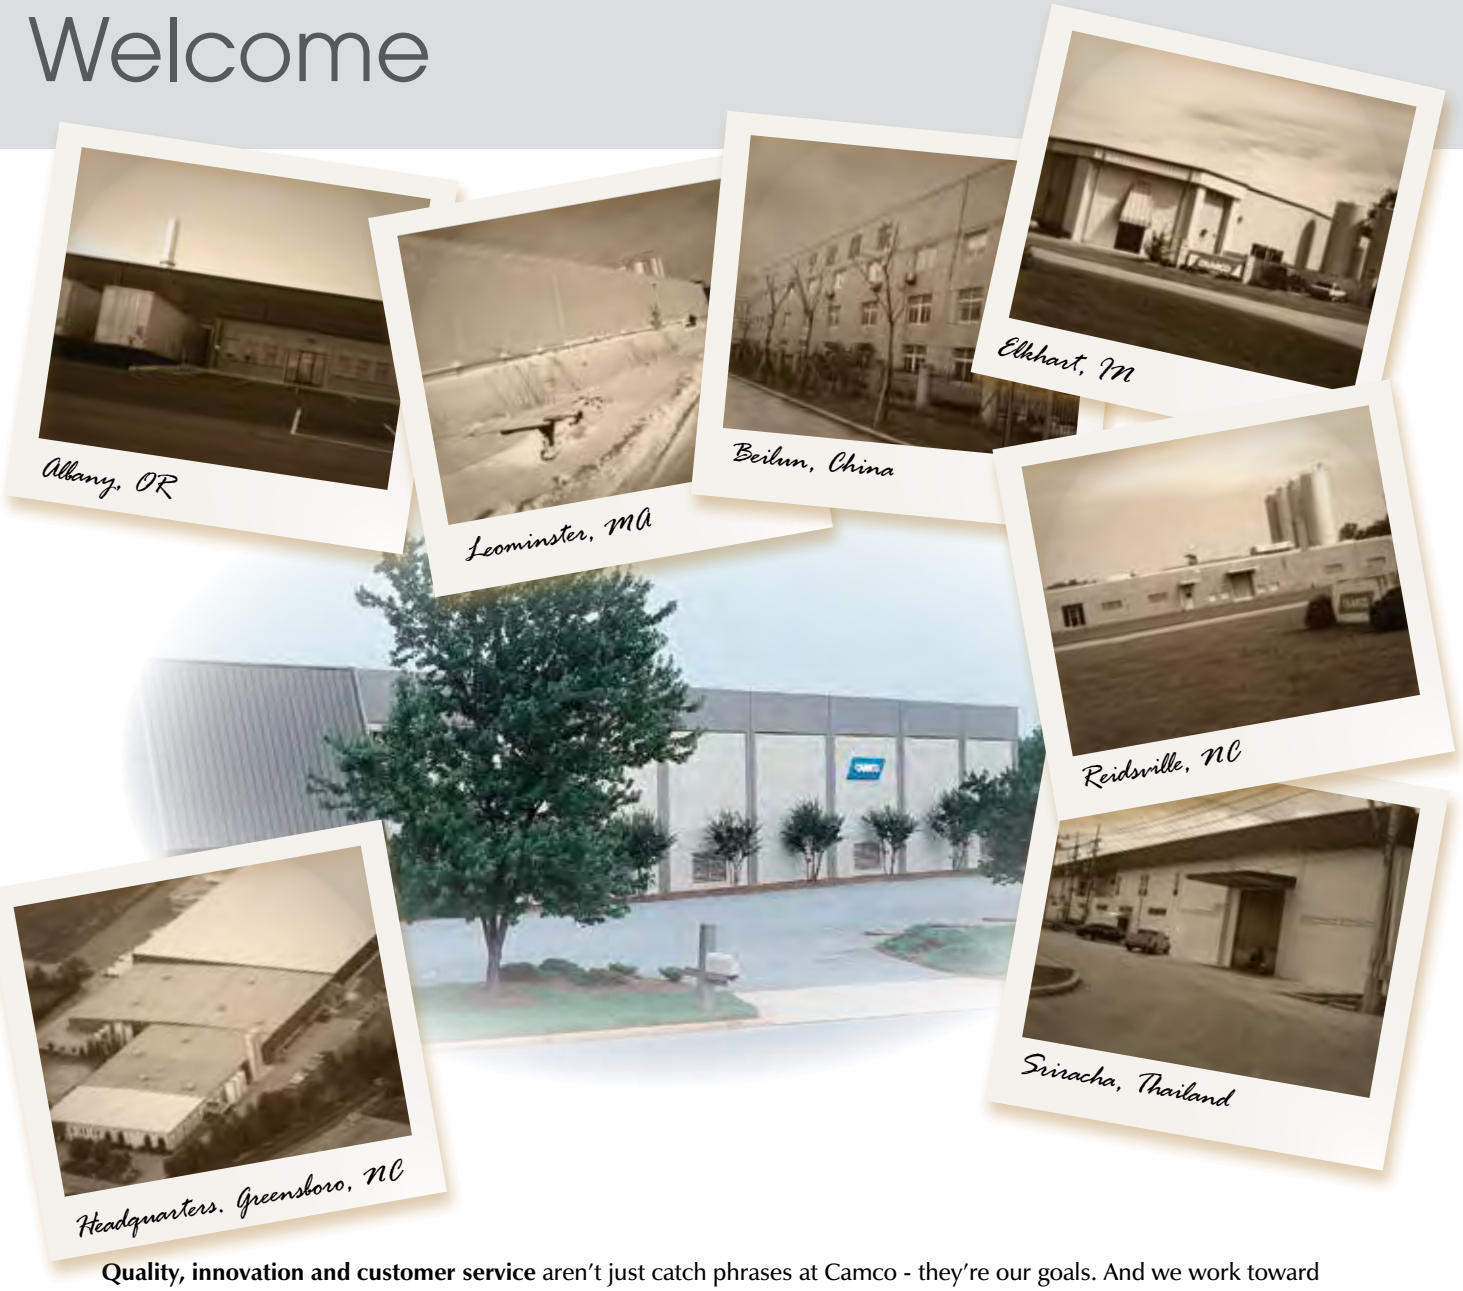
RV ACCESSORIES

CAMCO



Providing quality RV accessories for over 45 years

Welcome



Quality, innovation and customer service aren't just catch phrases at Camco - they're our goals. And we work toward them every day, in every department from the front office to shipping. Each of our more than 800 employees stands behind the products that bear the Camco name.

When Camco began in 1968 with one employee and one product, there was little indication that we would experience the phenomenal growth that resulted in our being named to the North Carolina Top 100 by Business North Carolina for six years in a row. Hard work, determination and adherence to these ideals have enabled us to achieve great success.

We take pride in providing outstanding service. Most orders received by noon are shipped the same day. Our friendly, knowledgeable customer service staff stands ready to assist our customers with any questions.

Camco is a small, privately-held company with big aspirations. When you place an order with us, we'll demonstrate this with our actions. Let us help make your business as successful as it can be.

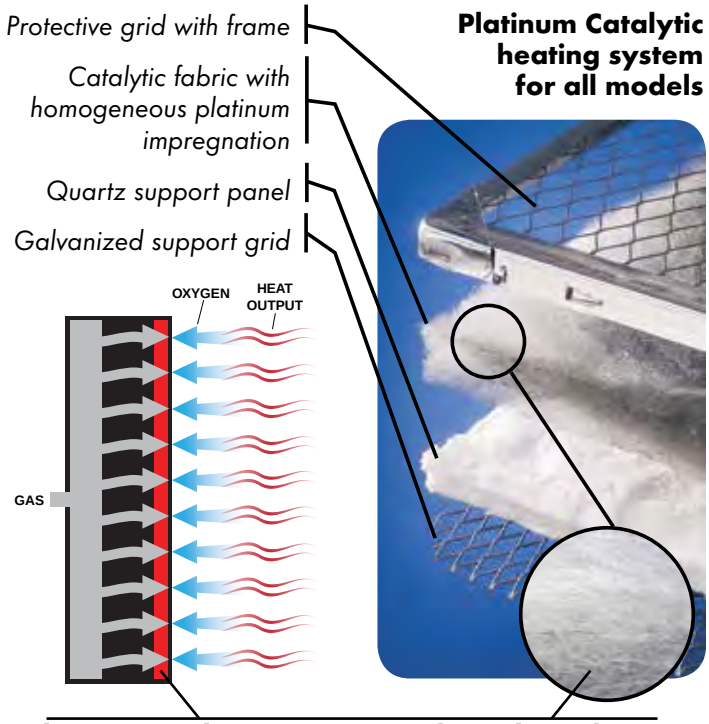
The Olympian™ Catalytic Heating Element

features a low-density spongy texture which allows for perfect transport of the oxygen needed for combustion. The catalytic heating element is evenly impregnated with platinum, guaranteeing optimal oxidation of gas and elimination of the mix of dangerous gas emissions.

Other brands use higher density supports which obstruct proper oxygen transport. Platinum distribution in their supports is not homogenous. Part of the gas can be released without burning, resulting in serious health hazards.



Olympian™ Platinum-saturated Catalytic Element

Flying Insect Screens Wasps, mud daubers, birds and rodents pose a serious threat to your RV water heater, furnace and stove. They can enter through vents and openings and cause serious damage by building nests that interfere with air flow. Protect your valuable investment by purchasing and installing Camco's Flying Insect Screens. These easy-to-install screens will help ensure that your vents stay free from costly invasion by unwanted pests. All except C, I, J and M–O include installation tool.

Camco offers a complete line of by-pass kits for a lifetime of durable performance. By-pass kits save antifreeze by allowing your water heater to be bypassed when winterizing.

A. **Supreme Permanent By-Pass Kit** Simple, permanent installation of this kit reduces the amount of antifreeze required to winterize by bypassing your RV water heater. Save gallons of antifreeze by not filling your water heater with antifreeze when you winterize. Brass valves provide non-restrictive flow. Comes with kink-resistant nylon reinforced hose.

35953 With 8" hose for 6 gallon tank
35963 With 12" hose for 10 gallon tank
37463 3-Way by-pass valve replacement

B. **Seasonal By-Pass Kit** This temporary by-pass kit allows you to hook up in the fall for winterizing and remove in the spring for reconnecting the system. Comes with kink-resistant nylon reinforced hose.

35713 Seasonal By-Pass Kit

C. **Quick-Turn Permanent By-Pass Kit** Save on antifreeze when you winterize with this easily-installed water heater by-pass kit. Sturdy, brass backflow preventer and 100% shut-off valve lets you bypass the water heater with a single turn. Patented.

35983 Quick-Turn Kit

D. **Boiler Antifreeze AL (not shown)** Advanced formula is safe for aluminum containing systems. A premium heat transfer fluid with special corrosion inhibitors for multi-metal corrosion protection. For use in traditional boilers and closed boiler and solar systems. Can be used with Aqua-Hot and Hydra-Hot systems.

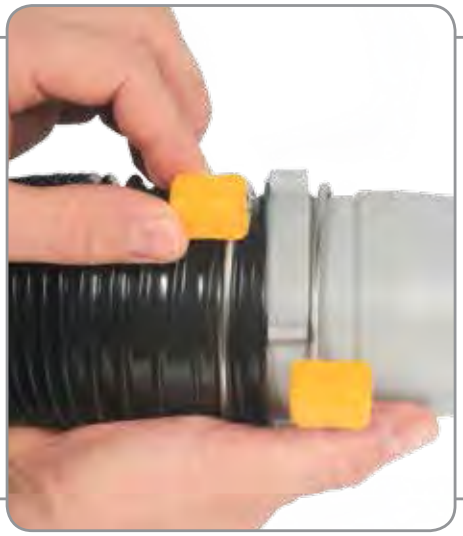
Patented Easy Slip™ sewer hose fittings are the most user-friendly fittings available today. Camco's Easy Slip™ fittings are made in the USA of engineering-grade resins for strength and durability.

No clamps or tools needed.



All Easy Slip™ fittings have Camco's patented Spin-Lock™ rings that rotate directly onto sewer hose wire for a secure hold. Just pull hose onto the fitting, turn the Spin-Lock™ rings around the hose to tighten, and you have a secure, airtight seal that eliminates odors and leaks. **There's no need for clamps or tools.** No other fitting gives you the ease, convenience and security you get every time you hook up with Spin-Lock.

RV Cleaning & Care

CAMCO

100% POWERFUL 100% BIODEGRADABLE

Camco's professional-strength RV care products are powerful, dependable cleaners that save you money and time. They dramatically reduce cleaning time and leave a showroom finish every time.

A. **Black Streak Remover** Power away stubborn black streaks caused by window and door sealant and roof coatings. Great for interior cleaning too.

41002 32 oz
41004 gallon

B. **Rubber Roof Cleaner & Conditioner** Deep clean and condition your rubber roof to extend its life. One application of this blend of surfactants and conditioners gets rid of black streaks, oxidation and road grime.

41062 32 oz

C. **RV Awning Cleaner** Remove mold stains, mildew stains, dirt, tree sap and road grime with the industrial strength formula that's safe for all awning fabrics.

41022 32 oz
41027 gallon

D. **Armada® AquaBlock™ Waterproofer & Stain Repellent** Contains UV and Mildew Resistant Agents. Most mills, including Sunbrella®*, apply a fluorocarbon polymer to the cloth at the factory for waterproofing and stain repellency. This is the most durable and effective waterproofing technology currently known. A polymer is like Teflon® for cloth. Armada AquaBlock uses virtually the same fluorocarbon technology as the mills do to last an entire season. Application is therefore more effective, durable and easier to use than a less compatible agent. AquaBlock has been independently laboratory tested against the three leading waterproofing products in the marine industry and was found superior.

40914 AquaBlock™ - 22 oz

E. **Armada® Carnauba Wash & Wax**

Cleans, Shines & Protects in one easy step!

This non-toxic and biodegradable wash & wax is a premium grade cleaner for fiberglass, metal and painted surfaces and is the only boat soap available with real carnauba wax. Replenish your wax while you wash so that your sparkling shine lasts in between washings and reduces the frequency waxing needed.

40922 Carnauba Wash & Wax - 32 oz

*Sunbrella® is a registered trademark of Glen Raven Inc.

A. **Trailer Glitter™** Bring back the luster to those dull exteriors and clean all the surfaces in your RV—metal, wood, plastic, fiberglass, paint—with just one product.

40602 32 oz
40607 gallon

B. **RV Wax Sealant** Beads better, shines brighter and lasts longer than other liquid waxes! Just apply to a clean surface with a damp sponge or soft cloth and let dry to a haze. Then buff off with a clean cloth for a showroom high-gloss shine.

41010 RV Wax Sealant

C. **RV Wash & Wax** Give your RV a clean finish and a hand-polished look without buffing.

Innovative Weight Distributing Hitch with Adaptive Sway Technology

- **Adaptive sway resistance**
- **Noise suppressed**

Easy On/Off Sway Control

- **Distribution bars are easy to move into place**
- **Turns off quickly for dangerous road conditions**

Automatic Sway Control Disengagement

- **Disengages for tight maneuvering**
- **Decreases wear**

Eaz-Lift Trekker is the perfect combination of premium weight distribution and sway control in an easy-to-install hitch. Trekker utilizes adaptive sway technology which goes above and beyond that of the competitors' weight distribution hitches. When towing and challenged with wind gusts and passing trucks, the Trekker reacts and increases resistance as needed! During sharp turns and maneuvering, when sway control is unnecessary, the Trekker disengages sway control completely for improved handling. When towing in dangerous conditions, such as slippery or icy roads, sway control is unwanted. Trekker's easy on/off sway control makes it a breeze to manually disengage. This feature also comes in handy when hooking-up and unhooking. Includes High-Low Shank.

48703 Trekker Hitch, 1,000 lb
48704 Trekker Hitch, 1,200 lb

Eaz-Lift's Trekker hitch is designed with Adaptive Sway Technology

Sway resistance is instant when driving on the highway. Trekker reacts and increases resistance as needed when challenged with wind gusts and passing trucks. When taking sharper turns or tight maneuvering where sway control is unnecessary, Trekker disengages sway for improved handling.

Gooseneck System

- **Adapts 5th wheel trailer to fit gooseneck trailer hitch***
- **Rated up to 30,000 lb.**
- **Available in 12- , 15- and 17-inch heights**
- **Easy to install**
- **Tow a 5th wheel trailer without a large hitch taking up the bed of your truck**

*Works in most cases

A. **Eaz-Lift Gooseneck Adapters** will convert most standard fifth-wheel trailers to a gooseneck trailer. This allows you to have the convenience of towing two types of trailers with only one truck. You will also enjoy towing a fifth-wheel trailer without having a large hitch taking up the bed of your truck. Eaz-Lift's Gooseneck adapters feature an automatic latching coupler for a simple hookup and disconnect. They have a 30,000 lb tow rating and are available in 12, 15 and 17 inch heights for your specific truck and trailer setup. Easy to install and each adapter comes with all of the parts and hardware needed for installation.

Round Bar Weight Distributing Hitches Over five decades ago, Eaz-lift became the first patented weight distributing system in North America. Designed with fewer parts, forge tapered round spring steel bars provide a smoother ride with interchangeable bars that have positive latching action for operation.
Eaz-Lift has a broad selection of weight distributing hitches that include right and left hand sway control mounts and bolt together ball mounts providing adjustability of ball height and ball mount angle. Each hitch includes hook-up brackets, spring bars, chains, ball mount, shank and hitch pin, clip and bolt package for adjustable hitches.

Do not overload any part of your towing system. Consult the vehicle manual for towing recommendations and limitations.

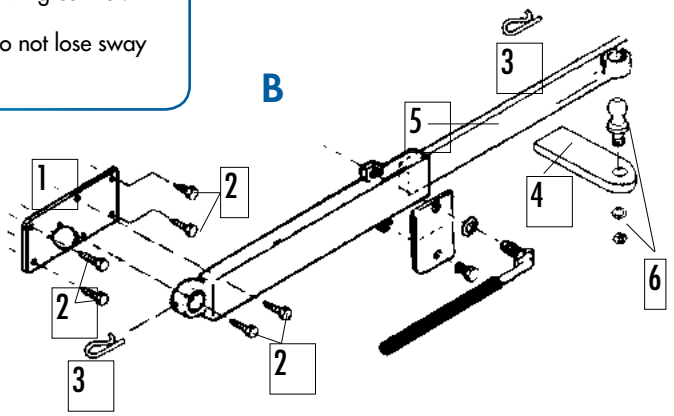
Why Eaz-Lift Sway Controls are better

than cam-action type sway controls:

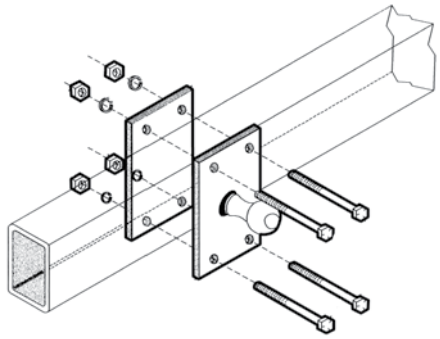
- Eaz-Lift Sway Controls do not create noise problems as does the cam action type.
- Eaz-Lift Sway Controls do not reduce road clearance.
- Eaz-Lift Sway Controls are easily released when road conditions do not warrant their use…unlike cam action type sway controls that depend upon hitch weight to operate and cannot be released on icy and oily road conditions where straight line action would possibly impair driving control.
- Eaz-Lift Sway Controls do not lose sway control ability in turns.

A

B



C



D

A. Eaz-Lift Sway Controls

minimize sway caused by passing trucks and sudden wind gusts, and they do not lose sway control ability in turns. Double friction pads provide constant sway abatement. Eaz-Lift Sway Controls attach with easy socket and spring clip connectors remove for easy storage. *NOT FOR USE ON TRAILERS WITH SURGE BRAKES.* Trailers over 25 feet long or smaller broad-sided trailers may require two Sway Controls. Use left hand Sway Control part number 48381.

A. **Chrome-Plated Steel Hitch Ball** of solid, machined steel. To choose the correct hitch ball for your towing need, check the inside of your coupler and the desired length of the shank on the ball needed. Hitch balls are marked with size and rating; it is important to match coupler size with hitch ball size.

Ball Mounts Ball mounts are 2" x 2" and are used to convert a receiver from a weight distributing to a weight carrying hitch. Ball mounts create a ball platform for attaching a hitch ball. The ball mounts or utility hitch bar length are determined by measuring from the center of the pull pin to the center of the hitch ball hole. The drop or rise is determined by measuring from the top of the mount to the top of the tongue (See ball mount selection chart). All 2" x 2" ball mount shank holes are 1", except 48280 and 48282, which have a 3/4" hole. (DURABLE POWDER COAT FINISH)

1 Drive your good tire onto the Trailer-Aid. This will lift your flat tire off the ground.

2 Remove your flat tire and mount your spare tire.

3 Drive off the Trailer-Aid and you're on your way.

Trailer-Aid® is a fast, safe, easy way to change your trailer's flat tire without having to unload your trailer.

A flat tire never happens at a good time, usually when you are by yourself on a busy highway, with a full trailer. Trailer-Aid® allows anyone to change a flat tire anywhere, anytime—without help, without a jack and without unloading.

Trailer-Aid® can withstand weights up to 15,000 lbs., and is waterproof and rustproof. Trailer-Aid® is made from a high-tech polymer which is both lightweight and strong as steel.

The front holes and rear slot allow for easy handling and access. Small and lightweight (only 5 lb), Trailer-Aid® stores easily and unobtrusively. It is light enough to be carried on the finger tips, and has clean edges that won't snag clothing or hurt your hands.

Trailer-Aid PLUS® is engineered specifically for recreational trailers. It gives your tire an extra 1" lift for performing maintenance on brakes, wheels and axles.

Both styles of Trailer-Aid come with a lifetime guarantee.

A. **Trailer-Aid®** Trailer-Aid is the fast, safe and easy way to change a trailer's flat tire. Made from lightweight super strong polymer, Trailer-Aid is easy to travel with and makes changing your trailer tire simple, even if you're alone.

F. Power Grip™ Electrical Protectant & Lube Use on any

electrical connector to improve conductivity and protect from oxidation. Also helps make connectors easier to insert and remove. Perfect for use with Camco's Power Grip™ Adapters and Extension Cords.

55013 Electrical Protectant & Lube

A. Power Defender™ with PowerGrip™ handles

Helps protect your RV from damaging low/high voltage levels and power spikes and surges. Camco's Power Guardians monitor incoming power, automatically disconnecting it when dangerous voltage levels are detected and automatically reconnecting once it stabilizes between 102–132 VAC. Reconnect Delay protects sensitive equipment, such as AC units, by not rapidly cycling power. Includes diagnostic lights for visual indication of faults. Water resistant unit incorporates integrated multilevel surge protection and diagnostic lights for visual indication of faults. Available in 30 and 50 AMP.

55301 30 Amp
55306 50 Amp

B. 30 Amp Circuit Analyzer

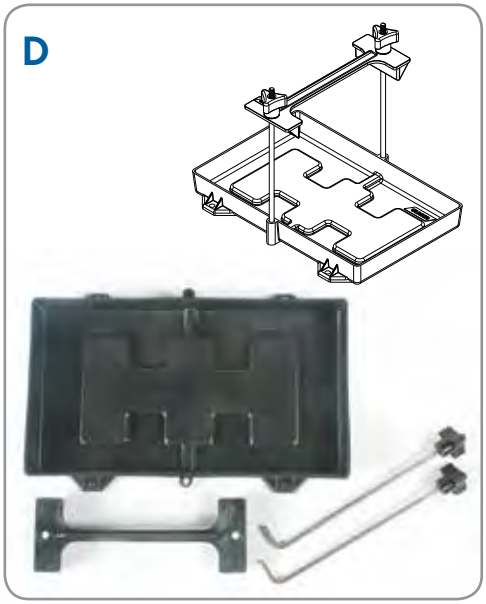
Help protect your RV from improperly wired electrical boxes. Diagnostic lights indicate faults before you connect your electrical cord. Also includes integrated surge protection.

55310 Circuit Analyzer

C. Battery Boxes

Lightweight, heavy-duty, corrosion-resistant polypropylene boxes are designed to secure and protect your battery. Both sizes include lift-off lid, durable woven hold-down strap, foot clamps and stainless steel screws. Choose small for group size 24 batteries or large for group sizes 27, 30 and 31. Both boxes meet USCG CFR 183.420 and ABYC E-010.7 specifications. Inside dimensions with lid (l x w x h) Small: 11.33" x 7.84" x 9.9"; Large: 13.87" x 7.87" x 10.9". Patented.

55362 Standard
55372 Large
55364 Replacement Strap



D. Battery Hold-Down Trays

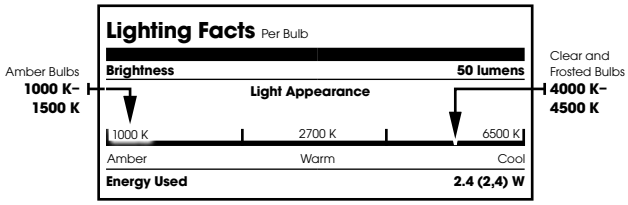
Made from heavy duty acid resistant plastic with stainless steel hardware. Meets USCG CFR 183.420 and ABYC E-10.7 specifications. Patented.

55394 Standard
55404 Large

E. Replacement Dome Lights

12V replacement dome lights in double or single style. Double light measures 12" x 4.25" x 1.5" (l x w x h). Single light measures 7" x 4.25" x 1.5" (l x w x h). Instructions and bulbs included.

41320 Double Replacement Dome Light
41330 Single Replacement Dome Light



Energy-Saving RV/Marine LED Bulbs

Long-lasting, energy-saving 12-Volt LED bulbs for RV and Marine use. Color temperature for clear and frosted bulbs is 4000–4500 K. Color temperature for the Amber bulb(54618) is 1,000–1,5000 K.

LIGHT BULBS

Camco offers both clamshell and bulk packages and we are committed to providing you a well designed product that has been developed through rigid adherence to product specifications. The nominal voltage for most of our bulbs is 12.0.

DESIGN VOLTS: The voltage at which the lamp is designed for rated amperage, candlepower and life characteristics.

CANDLEPOWER: The average value of total light output of miniature lamps at design volts.

LIFE HOURS: The rated average life to be expected when operated at design volts. Actual service life can vary depending upon application.

SERVICE DESC.: The major applications for each bulb. In most cases they can be used in many other applications.

FIG. NUMBER: Refers to the diagrams on page sides.

1. Non-skid ridge—tool slides to end for proper crimp.
2. Beveled leading edge for easy wire entry.
3. FUNNEL BARREL CONSTRUCTION for positive and easy wire insertion.
4. Crimp ridge for centering and locating tool on terminal barrel.
5. INJECTION MOLDED, 105° C RATED insulation of electrical grade vinyl plastic for uniform wall thickness and interface.
6. Multiple "V" grooves in #22 AWG to #4 AWG for maximum holding power and current flow.
7. Barrel-to-pad transition designed to maximize strength and minimize bending.
8. One piece, burr-free construction for maximum electrical conductivity. Electro-tin plating for maximum corrosion resistance.

Adhesive Lined Heat Shrink Tubing

Crosslinked polyolefin tubing with an internal meltable sealant. Recovers to 33% of its original diameter. As it shrinks, the internal sealant melts and physically encapsulates the covered item. This tubing is especially useful as a moisture barrier in high humidity and corrosive environments. Used for strain relief, wire splices, breakouts, connections, solder joints, delicate wire terminations and end sealing of cables and tubing.

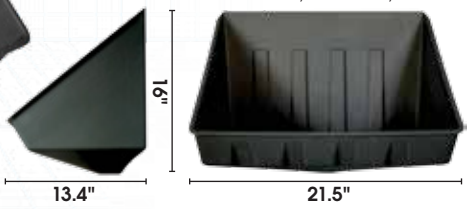
Tankless Water Heater Drain Pans

The Wall Saver™ is made of injection-molded no-break polypropylene to provide superior strength and durability. Wall-mounted drain pan fits under most whole-house tankless water heaters; is required by building codes. Recyclable and non-toxic. U.S. Patents 8104634 and D653745. W: 21.5"; H: 16"; D: 13.4". Drain fitting included.



11470 with PVC Fitting
11476 with CPVC Fitting

Heavy Duty Contractor Hose

Reinforced, abrasion resistant hose for hot water use. Spring reinforced to reduce kinking. Stainless steel fittings. ⅝" diameter. Easier to clean; drinking water safe. 10-year limited replacement warranty Available in 25 ft, 50 ft & 100 ft lengths.

Residential Water Heater Construction

Flexible stainless steel or copper connectors — connects to hot and cold water pipe system

Dielectric nipples or heat traps — with thermoplastic lining to prevent thread corrosion

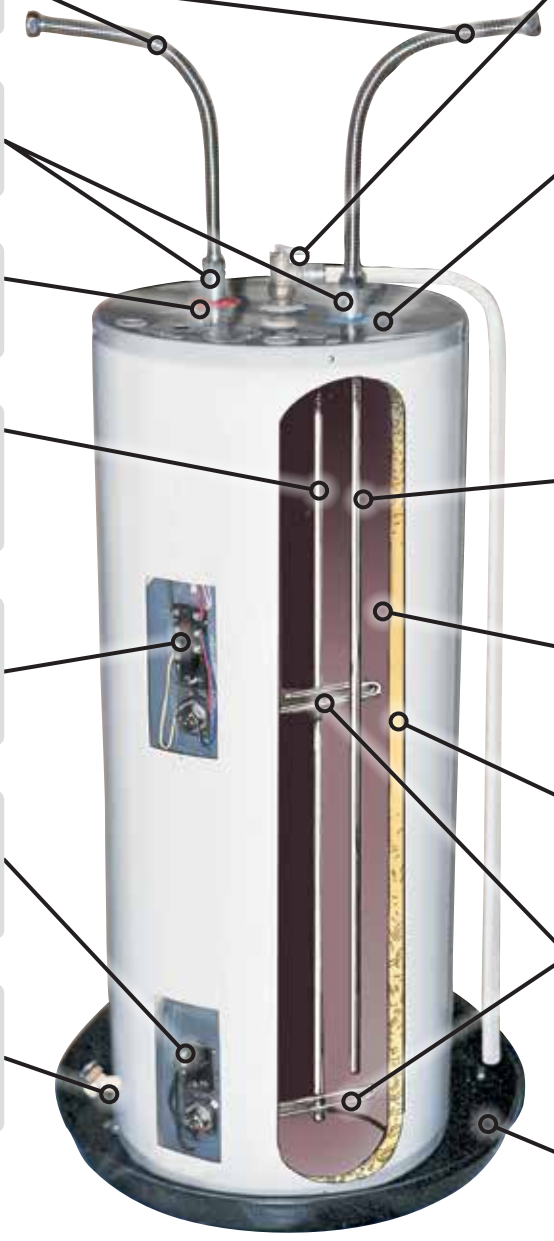
Hot water outlet — water supply to house faucets

Anode rod — a rod composed of sacrificial metal that prevents deterioration of the steel tank and elements by controlling electrolysis

Upper thermostat — turns heating elements on or off to maintain preset or desired temperature; regulates power to the lower thermostat

Lower thermostat — controls lower heating element to maintain desired temperature

Drain valve — a metal or plastic valve used when draining heater for periodic cleaning or replacement of a defective water heater element



Temperature and pressure (T & P) valve — safety device to relieve excessive pressure and/or temperature buildup in tank

Cold water inlet — supplies water for heating to the tank

Run-off tube — carries water or steam safely to drain or drain pan if T & P valve activates

Cold water dip tube — a non-metallic tube that directs incoming cold water to the bottom of the tank

Steel tank with glass lining— to prevent corrosion

Insulation — helps maintain consistent water temperature

Heating element — a resistant type electrical component to generate heat

Drain pan — plastic or metal pan to collect and drain off leaking water or water from activated T & P valve; must be plumbed to drain

Water Heater Element Warranty

CAMCO USA

Limited Warranty: Elements will be replaced to the original purchaser if proven defective in materials or workmanship. No labor costs are included in this warranty. Complete warranty information available upon request. Warranty is void if element is installed in anything other than a residential hot water heater.

Standard and Better Elements – 1 year from purchase date.

Premium Elements – 5 years from purchase date.

No expressed or implied warranty is made with respect to this product including warranty of merchantability or fitness for a particular purpose. If an item is determined to be defective our return policy is limited to the replacement of original purchase.

Frequently Asked Questions About Water Heaters

Electric Water Heater Elements

I don't have hot water. How do I determine what is wrong?

Check the breaker or fuse box for a blown fuse or tripped breaker. If this is not the problem, shut off the power to the water heater. (IMPORTANT!) The problem may be caused by a defective or shorted element(s) or thermostat(s) or both. If you are experienced with plumbing and electrical tools, you can do the repairs yourself. Camco Mfg. provides a water heater tester (#10023) that lets you test the elements and thermostats while they remain installed on the heater. Instructions are included.

What causes water heater elements to fail, some sooner than others?

Several reasons: power surges, lightning, lime buildup and dry-firing (see below: ***What is meant by the term "dry-firing?"***). Most water heaters are sold with high watt-density (HWD) elements. These are the least expensive and are the most susceptible to these problems. On a "Standard-Better-Premium" scale the HWD elements are STANDARD.

Why are some water heater elements folded back?

These are low watt-density (LWD) elements. The heat output (watts) per square inch of surface area is lower than that of a regular element. In order for total heat to be the same, the total surface has been increased. It is folded back so the length will fit the tank. Not all LWD elements are fold-backs. In areas with "hard" water, a LWD element resists lime build-up on its surface, thus extending its life. These elements are BETTER.

What are Lime Life elements?

These elements are PREMIUM. They are made of stainless steel and are ultra low watt-density. These features prevent lime build-up and extend the life of the element. A Lime Life element is resistant to dry-firing. These elements carry a limited 5-year warranty. Because of the low watt-density, these elements are folded back to reduce the length. Some are rippled to further reduce the length to fit the diameter of the tank.

What is meant by the term "dry-firing?"

High watt density and low watt-density are designed to function in water. If not surrounded by water, the intense heat they generate (dry fire) will cause them to burn out. The water tank must be full of water whenever the power is on. Dry-fire failure is not covered by any warranty. It is a human error. Dry-fired elements are easily detected. The element is soft and easily bent. In most cases, a hole is burned through the surface.

Can I replace the element in my water heater with higher wattage elements?

It is not recommended. The water heater is designed for that element size. Higher wattage might require heavier gauge wire and a larger capacity circuit breaker.

Can I use a water heater element in an application other than a water heater?

It is not recommended. These elements are designed specifically for residential water heaters. We have no experience or knowledge of other uses. You may do so at your own risk. Non-water heater use of our elements and thermostats voids all warranties.

I just installed a water heater element and now my heater makes a humming sound.

This is called a "harmonic." If the element is installed so that the loop is horizontal, the vibration from the electric current will cause the element to hum. This noise can be prevented by installing so that the loop is vertical. The flanged elements have markings on the flange indicating the vertical position of the loop. To eliminate the humming on screw-in elements, tighten the element another half turn. In some instances, less than a half turn will stop the harmonic.

Why aren't the two elements operating simultaneously?

In most residential water heaters only one element is on at any given time. The lower element does 90% or more of the heating. During periods of heavy use, the upper element clicks on (the lower switches off) and heats the upper part of the tank to 120°. It then shuts off, turns on the lower, and it heats the water to the setting of the lower thermostat.

Frequently Asked Questions About Water Heaters

Electric Water Heater Thermostats

Are water heater thermostats adjustable?

Most water heater thermostats provided by Camco are adjustable. They are factory set at 120°. On a two-element water heater, it is not recommended that the upper thermostat be adjusted. If a higher water temperature is desired, adjust the lower to a higher setting. Both may be lowered if a cooler temperature is desired. On thermostats without a degree dial, the temperature range is:

the Dot =	110º F
Hot=	120º F
A=	130º F
B=	140º F
C=	150º F
Very Hot=	160º F

I noticed that there are two styles of water heater thermostats. Are they interchangeable?

Yes, like models of the two thermostat manufacturers are interchangeable. Use caution in selecting the correct model for their position on the heater (upper, lower, single element T-stat).

How do I know which thermostat to buy?

A two-element water heater has two thermostats: an upper and a lower. Each must be replaced with a thermostat with the same function: upper for upper, lower for lower. They cannot be interchanged, as they perform specific functions. A single-element water heater has only one thermostat and that is called a "single element thermostat." The upper and lower thermostats for a two-element heater cannot be used on a single-element water heater and vice versa.

Other Miscellaneous Questions

I opened the drain valve and very little water flowed.

You probably have sediment and scale build-up on the bottom of the tank that is blocking the valve. In areas where the water is very "hard" or well water is used, lime build-up can occur. The high heat of the heater elements will cause scale and sediment to coat the elements and settle on the tank bottom. Light build-up of sediment may be removed by attaching a water hose to the drain valve. Drain the tank every 6-12 months, more often if necessary.

IMPORTANT: TURN OFF POWER FIRST OR IT COULD CAUSE ELEMENT BURN OUT.

The Temperature and Pressure relief valve has a threaded outlet. What attaches to it?

The T&P valve outlet must have a run-off tube attached to it. Most building codes require a tube that terminates 6" from the floor. If the T&P valve activates, water should flow into a drain or into a water heater pan that is plumbed to a drain. This run-off tube may be metal or plastic. Check local plumbing codes for correct material for your area.

What are dielectric fittings and connectors?

When fittings of unlike metals are joined together (copper with brass, brass with steel, etc.) the faint electrical current that is present in any water pipe system will cause erosion of the threads in one or both of the fittings and cause leaking. The plastic liner or sleeve in the dielectric fittings and connectors prevents this from happening. Note: Stainless steel fittings and connectors are naturally dielectric and do not need the plastic lining.

What is an anode rod?

It is a magnesium or aluminum rod inserted in the heater, from the top, in an opening of its own or as part of the outlet nipple. The metal is self-sacrificing (corrodes); this protects the tank and elements from corroding. Replacement anode rods are available and easy to install.

Are water heater drain pans necessary?

It depends on the plumbing codes in your area and the location of your water heater. If your heater is in a garage or a non-finished basement where leaking water would flow harmlessly into a drain, a pan is not necessary. However, if the heater is in or above a living space where leaking could cause extensive water damage, it is cheap insurance to protect your home from such an event.

What type of pan should be used?

Plastic pans should be used with electric water heaters, and metal pans should be used for gas water heaters and can be used with electric water heaters. Codes in some areas require metal pans for all heaters installed in a living space.

What is the purpose of a water heater stand?

A stand is used primarily with gas water heaters when installed in garages and basements where combustible fumes may exist. Gas heaters have an open flame, and tests have shown that placing a gas water heater at least 16" above the floor will offer some protection against combustion of volatile fumes.

Element Conversion Kit

Use a standard screw-in element to replace a flat, universal or round flange element using the Element Conversion Kit.

This adapter kit is intended for use with a screw-in type element to replace water heater elements that look like figures 1, 2 or 3.

Stock#	Description	Qty.
07223	Universal Adapter Kit	12

07223 contains: (1) 2-1/2" 4-bolt Adapt-a-Flange, (1) Four Hole Gasket, (4) 5/16" -18 5/8" Hex Washer-Head Bolts (1) Screw-In Gasket and (1) Thermostat Bracket

07222	2-1/2" 4-Hex Bolt Adapt-A-Flange only	50

Directions:
Remove screws and discard old element and thermostat bracket.
Install screw-in element and gasket supplied with element into square adapter flange. Tighten firmly.

Install gasket (supplied with this kit) in element seat, being careful to ensure a good seat. See diagrams to determine which gasket to use.

Install element with new thermostat bracket using old screws or new ones provided. Be careful that screws are not too long and bottom out against the tank.

Replacement gasket goes here.

Water Heater Thermostats and Accessories

About Electric Water Heater Thermostats

Double Element Heaters

The majority of residential water heaters are designed with two elements controlled by two different thermostats. The upper thermostat is the "brain" of the water heater. It controls the heat generated by the upper element, and it controls power delivered to the lower thermostat. Most residential water heaters are designed to have the upper and lower thermostats work separately.

The upper and the lower thermostats never operate simultaneously. The upper thermostat has a safety device attached to it called a High Limit Control (HLC). It has a heat sensor that will shut down the power to the heater if the temperature of the tank exceeds safety limits. The button may be reset to restore power to the heater. ***Do not reset the HLC until the problem causing the unit to trip is corrected.***

Operation Cycle of Double Element Heaters

1. The upper thermostat senses cold water and has energized the upper element. Although contacts on both thermostats are normally closed in response to the cold water, the double-throw upper thermostat completes the circuit only to the upper heating element. Because of the double throw action, power to the lower thermostat is cut off.
2. As the upper element operates, it heats the water above it (approximately one quarter of the tank's capacity).
3. The water in the upper quarter of the tank is heated until it reaches the temperature set on the upper thermostat. The upper thermostat then breaks the circuit to the upper heating element and completes the circuit to the lower thermostat.
4. The lower element then operates and heats the remainder of the water in the tank.
5. The lower thermostat breaks the circuit to the lower element when the water in the lower portion of the tank has been heated to its setting. The entire tank is now filled with hot water.
6. As hot water is drawn from the top of the tank, cool water is delivered to the bottom of the tank through the dip tube. The lower thermostat reacts to the entering cold water by closing its contacts, energizing the lower heating element and heating the water as it enters the tank.
7. Thermostats are factory preset at 120°.

Single Element Heaters (with high limit)

Most of the smaller water heaters and point-of-use heaters are designed with only one element and thus only one thermostat. Most of the single element water heaters are wired for 120v. Never connect or adapt a 120v water heater to a 240v system.

The high limit control is located on the thermostat. (See diagrams for proper wiring.)

NOTE: Because the HLC is attached to the single element thermostat, it looks similar to an upper thermostat for a two-element heater. Care should be taken in choosing the correct replacement thermostat. An upper thermostat will not work on a single element heater.

Water Heater Tester

Tests elements and thermostats while they are in the heater. May also be used to test continuity in fluorescent lights, fuses and all appliances. Sensitive enough to measure even the fine filament wire in a light bulb. Sensitive LED light indicates continuity. Unbreakable body with protective cover over light and probe. More useful than a circuit tester. Complete instructions and batteries included.

BOAT STANDS

Strictly for stabilization, boat stands are to be placed after the boat's entire weight is supported by keel blocking. The boat should be blocked on stable land and then stands placed down the length of the boat.

It is recommended that two stands be placed horizontally across from each other on the port and starboard sides in the aft position and two horizontally placed forward. A minimum of 4 stands is recommended in addition to a vee-top stand under the bow for sailboats. Stands should be placed no less than every 8' of boat length; on both the port and starboard sides.

Camco boat stand bases are powder coated and constructed of solid, cold-rolled, steel tubing.

Camco stands have been independently 3rd-party tested to withstand weight loads of more than 30,000 lb.

DETERMINING WHICH SIZE BOAT STAND BASE TO USE:

Camco sail and power boat stands are available in a range of sizes with minimum and maximum heights. The minimum stand height is the height from the ground to the topside of the plywood top when the steel threaded rod is rotated all the way into the stand with no threads showing.

The maximum height is from the ground to the topside of the plywood top when the steel rod is completely extended out of the base.

Best practice is to keep a minimum amount of threaded rod exposed and to keep the boat as low to the ground as possible depending on the depth of the keel.

A method commonly used to find the appropriate boat stand size is to subtract 6" from the boat's draft and the height of the blocking pile.

A. Boat Stand Tops

Our Vee Tops are designed specifically for front hull support on sailboats and some larger deep keel powerboats.
The Standard Swivel Top's thick plywood head is dip-painted and provides better rot resistance and cushion. Standard Swivel Tops and Premium Swivel Top Replacement Pad also feature counterbore screws which help prevent the chance of a screw coming in contact with the hull.
Premium Swivel Tops are made of high-density polyethylene with a non-marring TPE top to help protect hull.

Ball Mounts

Ball mounts come in popular sizes, 2" x 2", 1-1/4" x 1-1/4", and are used to convert a receiver from a weight distributing to a weight carrying hitch. Ball mounts create a ball platform for attaching a hitch ball. The ball mounts or utility hitch bar length are determined by measuring from the center of the pull pin to the center of the hitch ball hole. The drop or rise is determined by measuring from the top of the mount to the top of the tongue (See ball mount selection chart). All 2" x 2" ball mount shank holes are 1", except 48280 and 48282, which have a 3/4" hole. (DURABLE POWDER COAT FINISH)

- One-person hook-up on the first try every time
- Guides extend to 50 inches for easy viewing
- Takes guesswork out of lining up your hitch
- Attach one guide to tow vehicle and one to trailer
- System works with virtually any tow vehicle and trailer

A. Magnetic Hitch Alignment Kit

Camco's Magnetic Hitch Alignment Kit is designed for one-person hook-up on the first try every time. Easily visible balls take the guesswork out of linking up your hitch. Attach one guide to the tow vehicle and one to the trailer. Guides extend to 50 inches for easy viewing, and a swivel base allows the guides to be positioned directly above hitch and receiver. This system works with virtually any tow vehicle and any trailer: boat trailers, gooseneck trailers, fifth wheel trailers and horse trailers.

44603 Hitch Alignment Kit

B. Combo Bar

2" x 2" x 1/4" wall with collared tube, used to create under-car receivers for vehicles where standard or frame hitches are not available. Can be bolted or welded to vehicles undercarriage. Sized and punched to fit all common weight distributing hitch ball mounts or utility ball mounts. *Wt. Dist. only with 24" to 48" combo bar when properly installed. Fits 2"x 2" receiver.

Adhesive Lined Heat Shrink Tubing

Crosslinked polyolefin tubing with an internal meltable sealant. Recovers to 33% of its original diameter. As it shrinks, the internal sealant melts and physically encapsulates the covered item. This tubing is especially useful as a moisture barrier in high humidity and corrosive environments. Used for strain relief, wire splices, breakouts, connections, solder joints, delicate wire terminations and end sealing of cables and tubing.

LIGHT BULBS

Camco offers both clamshell and bulk packages and we are committed to providing you a well designed product that has been developed through rigid adherence to product specifications. The nominal voltage for most of our bulbs is 12.0.

DESIGN VOLTS: The voltage at which the lamp is designed for rated amperage, candlepower and life characteristics.

CANDLEPOWER: The average value of total light output of miniature lamps at design volts.

LIFE HOURS: The rated average life to be expected when operated at design volts. Actual service life can vary depending upon application.

SERVICE DESC.: The major applications for each bulb. In most cases they can be used in many other applications.

FIG. NUMBER: Refers to the diagrams on page sides.

Cleaners & Maintenance

100% POWERFUL 100% BIODEGRADABLE

A. **Armada® Black Streak Remover** An industrial strength, multi-purpose remover that safely and effectively eliminates black streaks. Armada Black Streak Remover contains no silicone or petroleum distillates, making it the safest product on the market for inflatable boat material and fenders. Black Streak Remover will also remove engine exhaust fume stains, oxidation and bird droppings.

40954 22 oz

B. **Armada® Spider Fighter** Remove ugly spider- and bird droppings with Armada Spider Fighter. Our concentrated citrus power eliminates black spots from fiberglass and is safe for all exterior surfaces, including clearcoat and gelcoat. A clear protective finish remains to help prevent spiders from returning, and the no-drip formula stays where you spray.

40872 Spider Fighter, 32 oz

C. **Blast-Out Degreaser** Fast-acting formula dissolves grease on contact. Super-concentrated cleaner safely removes grease, oil and dirt from driveways, garage floors, tires, engines, grills and more. Phosphate-free, and safe for plants and pets; contains no bleach or ammonia. Easy to use: just spray on and wash off.

41892 32 oz
41897 gallon

A. **Hose Hanger** While on your boat washing off the sea water from your latest voyage, keeping your water hose near-by can prove to be a struggle–but not if you have a Hose Hanger from Camco! The Hose Hanger hook holds securely on to rails up to 1 inch in diameter. One-piece design features molded-in, standard-sized, male and female water connections, which allow it to connect easily–in-line–right between your water hose and spray nozzle. No more chasing your water hose around a wet, slippery boat that's rocking back and forth and no more fishing your water hose out of the sea. Made of the light-weight, impact-resistant ABS with silicone hose washer for a water-tight seal.

A. Armada® True Wax Sealant

Easy on... Easy off! For the longest lasting protection available from a liquid wax, turn to Armada True Wax Sealant. True Wax contains 100% carnauba wax, UV sunlight inhibitors and fluorocarbon polymer resins. It stays liquid longer and can be applied to larger areas at a time before hardening. True Wax can be applied in extreme heat or cold and one application lasts a whole season! Perfect for fiberglass, chrome, gelcoat, rubber and vinyl!

40966 True Wax, 16 oz
40967 True Wax, gallon

B. Armada® Carnauba Wash & Wax

Cleans, Shines & Protects in one easy step! This non-toxic and biodegradable wash & wax is a premium grade cleaner for fiberglass, metal and painted surfaces and is the only boat soap available with real carnauba wax. Replenish your wax while you wash so that your sparkling shine lasts in between washings and reduces the frequency waxing needed.

40922 Carnauba Wash & Wax, 32 oz
40927 Carnauba Wash & Wax, gallon

C. Armada® Liquid Compound & Color Restorer

This advanced blend of rubbing compound combined with a proprietary color restorer formula will remove medium to heavy oxidation, chalking, rust, soot and exhaust stains from fiberglass. It will leave a high gloss finish and is a perfect first step in restoring fiberglass and gelcoat to its original shine and color. Self-dissolves while buffing so it leaves a dust-free, high-gloss finish. Rinses off easily with water or a clean towel. Follow with Armada True Wax Sealant to provide the longest lasting protection available.

40986 Liquid Compound, 16 oz

D. Armada® One-Step Cleaner Wax

A proprietary high-tech cleaner wax designed for the toughest jobs! Removes medium oxidation and chalking, rust and exhaust stains while leaving behind a slick, hard, high gloss barrier that protects against UV sunlight, acid rain, exhaust stains, salt and soot for a whole season!

40976 One-Step Cleaner Wax, 16 oz
40977 One-Step Cleaner Wax, gallon

A. Armada® AquaBlock™ Waterproofer & Stain Repellent

Contains UV and Mildew Resistant Agents. Most mills, including Sunbrella®*, apply a fluorocarbon polymer to the cloth at the factory for waterproofing and stain repellency. This is the most durable and effective waterproofing technology currently known. A polymer is like Teflon® for cloth.

Armada AquaBlock uses virtually the same fluorocarbon technology as the mills do to last an entire season. Application is therefore more effective, durable and easier to use than a less compatible agent.

AquaBlock has been independently laboratory tested against the three leading waterproofing products in the marine industry and was found superior.

40914 AquaBlock™ 22 oz

B. Armada® Lightning Fast Wax

Just spray and wipe to add a sparkling high performance wax shine to your boat with Armada Lightning Fast Wax! Perfect for touch ups; it is a quick and easy wet or dry application that is perfect for use on fiberglass, all painted surfaces and stainless steel (do not use on glass windows).

40885 Lightning Fast Wax, 16 oz

C. Armada® Mighty Brite® Mildew Stain Remover

A revolutionary, dry-powder formula developed to remove organic stains such as mildew, mold and other fungi and dirt. Also helps brighten soiled material. Perfect for vinyl, cloth, Sunbrella®* and canvas materials (not suitable for silk, leather or wool). Non-toxic and biodegradable. Will not cause damage from over-use and is safe on all colors. 16 oz container makes 4 gallons.

40904 Mighty Brite, 16 oz

D. Armada® Bilge Cleaner

Super Concentrated, professional strength formula dissolves and eliminates grease, oil, fuel, scum, and sludge from your bilge while leaving behind a fresh clean scent. Non-toxic and biodegradable.

40897 Bilge Cleaner, gallon

A. Evo™ Premium Water Filter with replaceable cartridge

Reduces bad taste, odors, sediment, bacteria, chlorine and much more. Includes filter housing, one extension hose and one replaceable premium spun polypropylene filter cartridge. Filtration begins with water traveling through a porous shell with openings no greater than 5 microns in diameter. Filtered water then passes through a bed of KDF® and GAC (Granulated Activated Carbon) for further filtration and bacteria control. The result is fresh, clean, great tasting drinking water straight from your tap. For exterior use.

40631 Evo™ Premium Water Filter
40621 Evo™ Spun PP Cartridge

B. Water Filter Stand

Hold your water filter upright and off the ground. Foot bar makes it easier to secure the stand in the ground. Lightweight. Zinc coated to inhibit rust.

40772 Water Filter Stand

C. Evo™ Premium Water Filter VOC Replacement Cartridge

Designed as a replacement cartridge for Camco's Evo Water Filter housing. Filtration begins with water traveling through a porous shell with openings no greater than 5 microns in diameter. Filtered water then passes through a bed of KDF® and GAC (Granulated Activated Carbon) for further filtration and bacteria control. ***Contains premium carbon with a high microporosity level for absorbing harmful VOCs (Volatile Organic Compounds)***. The result is fresh, clean, safe, great tasting drinking water straight from your tap.

40624 Evo™ VOC Water Filter Cartridge

A. TastePURE™ KDF®/Carbon Water Filter

Larger capacity filter lasts an entire season. Greatly reduces bad taste, odors, chlorine and sediment in drinking water with a 100 micron fiber filter. Durable in-line, exterior mount filter has a wider body to increase flow. Includes flexible hose protector to minimize kinking.

40043

B. TastePURE™ Marine Water Filter

Attaches inline to your hose to improve the taste and smell of your drinking water for up to 120 days. Filters down to 150 microns. Also eliminates water spots on fiberglass when used for washing down.

40645

C. TastePURE™ Spring Fresh™

Clean and deodorize your boat's fresh water systems with this safe, biodegradable formula. De-winterize fresh water holding tanks and lines. Good for periodic cleaning, freshening and deodorizing. One step, no-measure solution requires no mixing or preparation. One gallon cleans up to a 100 gallon tank.

40207 gallon

D. TastePURE™ Drinking Water Freshener

Eliminate algae and slime buildup from drinking water tanks. Just one ounce helps remove bad smells and taste from 20 gallons of water.

40208 16 ounce

E. TastePURE™ DE-Winterizer

For use with boats coming out of storage. Just one bottle freshens and deodorizes your Fresh Water System from tank to tap. Can be used for year-round freshening. Treats up to 60 gallons.

40218 16 ounce

D. Hose Hanger

While on your boat washing off the sea water from your latest voyage, keeping your water hose near-by can prove to be a struggle–but not if you have a Hose Hanger from Camco! The Hose Hanger hook holds securely onto round rails up to 1 inch in diameter. One-piece design features molded-in, standard-sized, male and female water connections, which allow it to connect easily–in-line–right between your water hose and spray nozzle. No more chasing your water hose around a wet, slippery boat that's rocking back and forth; no more fishing your water hose out of the sea. Made of the light-weight, impact-resistant ABS with silicone hose washer for a watertight seal.

20191 Hose Hanger

A. Cold Weather Water Hose

Keep your water supply flowing even in freezing temperatures. Camco's Heated Water Hose combines a drinking-water-safe hose with a self-regulating heat source which is encapsulated in an all-weather, PVC coating for durability. Features machined and Nickel-plated fittings for maximum corrosion protection. Includes a female-to-male adapter for connection of the water source to either end of the hose; depending on the location of your electrical connection.
