

Clean surface.

Surface must be dry and free of dust, dirt, oil and grease.

Apply exactly in the correct location the first time.

Trying to remove DiSeal may damage the tape and roofing. **DO NOT STRETCH.**

Do not try to cover large areas by butting DiSeal end-to-end or side-to-side (butt joints).

Press down firmly.

Use squeegees with heavy pressure, starting in the center and working towards the outside edge removing bubbles to assure complete contact. Edges must have no opening, tunnels, or fishmouths.
