Item: PDK 25503

BuffBall

CARE AND USE GUIDE

Super Mini BuffBall

Mini 3" BuffBall

5" BuffBall

7" BuffBall

INSTRUCTIONS FOR USE:

- Properly secure FLITZ BUFFBALL onto drill or air tool (Use only in forward or right rotations).
- Apply thin coat of FLITZ POLISH onto surface.
- Buff lightly and allow polish to break down.
- Increase speed and buff at high speed (up to 2500 rpm).
- Repeat until desired result.

WASHING INSTRUCTIONS:

Machine Wash:

- Use regular laundry detergent (add Oxiclean for best results).
- Do not use fabric softeners.
- Air dry only (machine dry will void warranty).

Hand Wash:

- Soak in a bucket for 1 hour with dish soap and Oxiclean.
- Rinse out with hose or in shop sink.

WARRANTY:

Lifetime warranty against premature failure. Warranty void when using polishing compounds other than FLITZ POLISH.

Valve Covers & Motor Castings, Aluminum & Chrome Wheels, Painted & Plexiglass Surfaces, Chrome Exhaust Pipes, Headlights, Diamond Plate

FARMING

Painted Tractors, Aluminum Livestock & Horse Trailers, Painted Tractor Wheels, Headlights, Exhaust Pipes

FLITZ TIPS

WHEELS

For best results apply a small amount of FLITZ POLISH and spread with FLITZ BUFFBALL at low speed. Finish with a high speed pass.

HEAVILY OXIDIZED ALUMINUM

To save time, use FLITZ METAL PRECLEAN to remove stubborn oxidation & salt water staining. Rinse with water and dry. Apply small amount of FLITZ POLISH to remove oxidization.

CLEAR COATING ON METAL

To remove tarnish beneath a clear coat, remove clear coat with a paint stripper (available at most hardware stores), then apply FLITZ POLISH to remove tarnish.

HEAT DISCOLORATION

For chrome exhaust pipes, truck stacks & stove-tops warm the surface just above room temperature, apply FLITZ POLISH and let sit for 3 minutes; rub vigorously with paper towel. Repeat if necessary.

HEADLIGHTS

Apply FLITZ POLISH directly on to outside of headlight lens and run FLITZ BUFFBALL at a slow speed to spread the polish out. Increase speed to polish and make an exceptionally clear finish. NOTE: Some headlights have a clear coat over the lens. First try the FLITZ 1000 GRIT ABRASIVE PAD with water to remove the yellowing. After, this may require wet sanding to remove. Use 800 grit wet/dry sandpaper to wet sand the film off and follow up with 1500 to 2000 grit for a smooth surface, buff with FLITZ to finish.

HEAVY TARNISH AND ANTIQUES

For brass, copper & bronze only. Wipe or spray FLITZ INSTANT BRASS & COPPER TARNISH REMOVER on surface to be cleaned. Take caution and wear gloves. Let sit for 1 minute and wipe. Repeat if necessary. Once clean, polish with FLITZ POLISH and FLITZ MICROFIBER CLOTH for a long-lasting shine.

FIBERGLASS & PAINT

FLITZ POLISH safely removes oxidation, sun fading and minor scratches on fiberglass, plexiglass and painted surfaces. Apply FLITZ POLISH with damp FLITZ MICROFIBER CLOTH and finish with dry microfiber cloth OR apply polish and spread with FLITZ BUFFBALL at low speed and finish at high speed for best results. For longer lasting results use FLITZ SPEED WAXX to finish and protect surface.
