PRODUCT OVERVIEW

The successor to the highly popular MS-RA205, the new MS-RA210 is the first non-Apollo marine stereo featuring Fusion's new-look design aesthetics and revolutionary Digital Signal Processing (DSP) technology. With a compact form factor, the MS-RA210 features a 2.7" optically bonded color LCD display, built-in Class-D amplifier, Multi-Zone™ technology in two zones, and Fusion-Link™ integration. Designed to deliver quality sound with a powerful feature set at a competitive price point, the MS-RA210 is the perfect choice for a marine stereo that will enhance your time on the water.

HIGH QUALITY AUDIO THROUGH DSP

The power of Fusion's Digital Signal Processing (DSP) enables the optimization of Fusion speakers in each audio zone on your vessel. Our system approach ensures every step of the audio chain is optimized through calculations by our engineers to deliver a technically superior listening experience – without the need for you to have a technical understanding. From the kick drum to your eardrum Fusion DSP reproduces your music the way the musicians intended.

IPX6 AND IPX7 WEATHER RESISTANT RATING

Enjoy confidence that your MS-RA210 marine stereo will last season after season in the harsh marine and outdoor environment. Meeting both IPX6 and IPX7 international standards for water resistance from the front panel when installed correctly, the MS-RA210 is built to last on board.

OPTICALLY BONDED COLOR LCD

The MS-RA210 features the same 2.7" brilliant, optically bonded, full-color LCD display from the Apollo RA670 and SRX400. Colorful album art with metadata displays information of the current track playing such as artist, album and track title - adding enhanced aesthetics to the helm.

FUSION-LINK CONTROL VIA NMEA2000 / BLUETOOTH

Fusion-Link makes control of your on-water entertainment easier than ever. Quickly find your favorite song, tune in to the sports or turn up the volume, all from your Fusion-Link partnered MFD, compatible smartphone, tablet or Garmin watch.

(* A SiriusXM Connect vehicle tuner and subscription required to access SiriusXS satellite radio (available in USA only). DAB+ radio requires the addition of an MS-DAB100A module (available in Europe and Australia only, does not support traffic and weather).

KEY FEATURES

The **MS-RA210**, with its innovative technology and design, offers a new world-class audio entertainment experience, featuring:

KEY FEATURE

The MS-RA210 harnesses the power of Fusion's built-in advanced DSP, letting you optimize each audio zone on your vessel with your Fusion speakers and amplifiers for premium listening in any environment.

KEY FEATURE

The color LCD is optically bonded to improve durability and protection against condensation and fogging, and is optimized for daylight viewing. Enjoy enhanced aesthetics with colorful album art to display information of the current track playing.

KEY FEATURE

Fusion-Link™ is the industry standard protocol for on-water audio integration and control. Fusion-Link enables you to control the entertainment right from your partnered marine Multi-Function Displays (powered NMEA2000 network required), compatible devices and Garmin watches.

Two independent audio zones are available for a customized listening experience across your vessel, each with advanced localized audio options, including volume limits, zone naming, tone control, balance, disabling zones and more. Note that for both zones, subwoofer and full range line outs require additional amplification.

Enjoy confidence that your MS-RA210 will last season after season in the harsh marine and outdoor environment. Meeting both IPX6 and IPX7 international standards for water resistance from the front panel when installed correctly, the MS-RA210 is built to last on board.

Class-D amplifier delivers a higher efficiency and greater output, meaning you can listen to your music louder for longer without worrying about battery drain.

200 W peak power output

4 Ohm stereo stable

Album art support for Apple devices via Bluetooth or USB. Album art support for Android and USB devices via USB only.

With the same mounting footprint as the MS-RA205, the compact design of the MS-RA210 increases installation options and versatility making it easier to get a quality marine stereo onboard.

PRODUCT COMPATIBILITY

SPEAKERS

XS SERIES

7.7" | 6.5" | 4"

Acoustically optimized for an excellent on-water audio experience, enjoy high performance acoustics on the water season after season. Continuing to set the benchmark for marine audio entertainment, these full range speakers feature Fusion's quality trademark audio reproduction, enhanced marine aesthetics and now RGB LED lighting, all at a mid-range price point.

EL SERIES

6.5"

Energize your boating experience with the entry-level EL Series speakers. Enhance your time spent on the water with quality audio and RGB LED illumination to set the tone. Providing more installation options than traditional speakers, the extremely versatile EL Series speakers are designed with a shallow basket which allows them to be installed where many other speakers cannot.
