The leading marine and mobile electrical companies are working together

For decades Ancor, BEP, Blue Sea Systems, Marinc, Mastervolt, and ProMariner have worked independently to lead the industry in innovative electrical solutions. Now the six companies are working together to offer the broadest and most complete electrical solutions for marine and mobile applications.

ANCOR Marine Grade Tinned Wire, Terminals, and Wire Management Products

BEP Battery Management and Czone Digital Switching

BLUE SEA SYSTEMS Battery Management, Circuit Protection, and Panels

MARINCO AC Shore Power, DC Power Connection, and Accessories

MASTERVOLT High Amp Chargers, Inverters, and Power Conversion Products

ProMariner™ Battery Chargers, Inverters, Inverter/Chargers, and Galvanic Isolation

All of the products are designed to easily integrate into simple or comprehensive electrical systems. The world's top manufacturers of boats, emergency vehicles, and RVs are recognizing the quality electrical systems and are specifying our products as original equipment.

The challenge, and our promise is to leverage the deep product understanding in each of our companies with coordinated product development, an ABYC certified technical sales team, and an industry-leading customer service and support group.

What makes Maringo different:

| Founder's Vision

Since 1972, Marinco power inlets and cords have set the industry standard. They are built to withstand the harshest marine environments. Maringo has continued to expand their product line to offer a complete range of shore power cords from 16 to 100 amps, as well as a broad range of cord adapters. Maringo is also a leading supplier of wipers, spotlights and horns to the marine industry. Quality, innovation, and our passion for boating are what define Maringo.

| Innovation & Engineering

Marinco engineers and manufactures a range of high quality electrical solutions designed for the harsh Marine and RV environments. Every product we make meets exacting performance specifications and is designed to withstand extreme conditions both at sea, and on land.

| Selection

Over 800 electrical products are designed to work together as a system

| Fast Delivery

Products stocked in multiple global locations ensures rapid order fulfillment

| Worldwide Access to Product

A distribution network in over 45 countries provides access to products when they are needed

| Information

24-hour access to product information, selection tools

| Industry Standards

Industry involvement ensures products meet ABYC, NMMA, and Coast Guard standards

| Quality

Product quality is managed in a manner consistent with international standards

2016 **NEW** Products

23 15A to 50A 125/250V Straight Adapter

Part # S15-504

Allows connection of 50A 125/250V inlets to 15A 125V cords.

41 White SeaLink® Deluxe Dual USB Chargers & Receptacle

Part # 12VDUSBW-B Dual USB

Part # 12VCOMBOW-B Dual USB & 12V Receptacle

2.1A total output with LED power indicator light for USB charging of common mobile devices.

41 SeaLink® Deluxe Dual USB Chargers & Receptacle (w/o LED)

OEM # 12VDUSBN-B Dual USB

OEM # 12VCOMBON-B Dual USB & 12V Receptacle

2.1A total output for charging common mobile devices.

49 ChargePro® 20A & 30A Battery Chargers

Part # 28220 20A

Part # 28330 30A

On-Board smart battery chargers quickly and efficiently charge and maintain batteries. Meets CEC requirements.

((Lower Frequency))
for a Deeper Sound))

79 Updated Electric Horns

Multiple improvements, including increased dB(A) levels, lower frequency and all stainless steel hardware on select models. All mounting patterns remain the same for drop-in replacement.

79 Electric Horn Grills

Contemporary snap-on or fasten down vertical horn covers in multiple colors and materials.

19 Gray Power Cord® Plus Cordsets

- Part # 199117G** 30A 125V, 25 ft
- Part # 199119G** 30A 125V, 50 ft
- Part # 6152SPPG-25** 50A 125/250V, 25 ft
- Part # 6152SPPG** 50A 125/250V, 50 ft

Heavy duty, super flexible marine-grade cable with watertight molded plugs and connectors. The boatside connector features a molded-in LED light for visual power indication.

20 15A Marine Grade Locking Extension Cords

- Part # 150025** 25 ft, locking
- Part # 150050** 50 ft, locking
- Part # 150025NL** 25 ft, non locking
- Part # 150050NL** 50 ft, non locking

Marine-grade 14/3 SJTOW cable and a universal slide button lock on the female end for protection against cable disconnection. The lighted female end provides visual power indication.

25 15A to 50A Pigtail Adapter

Part # 150SPP

Allows waterproof connection of 50A 125/250V inlets to 15A 125V cords. The adapter is fully molded with a sealing collar for use in wet locations and contains an LED light for visual power indication.

43 70A Trolling Motor Plugs & Receptacles

- Part # 12VBR53** Receptacle
- OEM # 12VBR53.OEM** Receptacle
- Part # 12VBPS3** Plug
- OEM # 12VBPS3.OEM** Plug
- Part # 12VCPS3** Plug & Receptacle

70A plug and receptacle for modern trolling motors in a compact, waterproof footprint. The plug features an integrated strain relief and thumbprint locator to mate with the keyed receptacle.

51 1.5 Amp ChargePro® Maintainer

Part # 2701A
Highly reliable, Guest 1.5 Amp maintainer extends battery life and will charge, monitor and re-charge your battery if the voltage drops below 12.9V. The maintainer can be safely connected to the battery for short or long periods of time.

64 3000 Waterproof Wiper Motor

- Part # 83081** 1.5 shaft, 80° sweep
- Part # 83011** 1.5 shaft, 110° sweep
- Part # 83082** 2.5 shaft, 80° sweep
- Part # 83012** 2.5 shaft, 110° sweep

High torque wiper motor in an IP66 waterproof aluminum housing. Maximum arm/blade combination is 24" with multiple sweep angle settings.

81 Under Deck Horn

- OEM # 11044** Horn with Pigtail
- OEM # 11045** Horn without Pigtail

Hidden horn with permanently mounted grill to protect against water intrusion. Available with and without pigtail for ease of installation.

89 IP67 Stainless Steel Spot/Floodlight & Remotes

- Part # 22050A** Spotlight with remote
- OEM # 22051A** Spotlight without remote

Classic styling meets modern technology in the new Wireless IP67 Stainless Steel Spot/Floodlight.

96 Day/Night Solar Vent

- Part # N20803W** 3" White
- Part # N20803S** 3" Stainless Steel
- Part # N20804W** 4" White
- Part # N20804S** 4" Stainless Steel

Threads into included deck plate, and is removable from outside without tools. On/off fan switch, LED lights and intake/exhaust switch accessible from inside the cabin for ease of use.

SHORE POWER

Inlets

12

Marinco® Power Inlets are the industry standard. Offered in three styles, featuring robust construction and corrosion-resistant materials for long life in the harsh marine environment. All inlets have an IP56 rating.

Cordsets

18

All Marinco® cordsets are made of the highest quality, marine grade construction with features you won't find on other power cords.

15A Marine Grade Locking Extension Cords

20

NEW

15 Amp extension cords contain a universal slide locking mechanism to prevent cable disconnection. Available in 25' and 50' lengths.

Cordset Accessories

21

Marinco offers everything you need to manage your shore power equipment.

SHORE POWER

Adapters

Marinco® Shore Power Adapters give you more power hook-up flexibility and resolve a variety of dockside power center / boat side inlet power incompatibility problems.

Devices & Accessories

Everything you need to maintain and repair your shore power equipment.

Boxes / Covers / Replacement Parts

A wide range of receptacle boxes and shore power replacement parts.

International Shore Power

Marinco offers inlets, connectors and cordsets for 16 Amp, 32 Amp and 63 Amp Shore Power systems.

Marinco® power inlets and cords have been the industry standard and are designed and built to withstand the rigors of the marine environment.

Inlets

Marinco® Power Inlets are the industry standard. Offered in three styles, they all feature robust construction and corrosion-resistant materials for long life in the harsh marine environment. Each has technical features that make them easy to install and a pleasure to use for the marine professional or the casual recreational boater. All inlets have an IP56 rating.

Stainless Steel

Marinco® stainless steel inlets are solid cast marine grade 316 stainless steel and include a heavy duty cap strap for strength and durability.

Contoured

Marinco® contoured inlets feature UV stabilized glass-filled polyester construction for long-lasting strength.

Standard

Marinco® standard inlets feature UV stabilized glass-filled polyester construction for long-lasting strength.

- 1 Easy Lock™—Marinco®'s exclusive Easy Lock™ System has been designed to make hook-up quick and easy. Just connect the cordset (with an Easy Lock™ locking ring installed) to the inlet and turn the locking ring less than a quarter turn. The tabs on the locking ring lock into the inlet for a positive watertight hook-up while eliminating any chance of cross threading. The locking ring features lock locators positioned at 180° to improve finger grip during attachment.

Easy Lock™ inlets have a threaded boss that will accept threaded cordsets as well. The Easy Lock™ system is a standard feature on some Marinco® 30 amp and 50 amp inlets and cordsets.

- 2 The covers on all Marinco® inlets are designed to stay hinged open when the cover is lifted up. This allows the boater to connect their shore power cord while the cover remains open and out of the way. A soft touch unlocks it for closing.
- 3 Blades are nickel plated brass for maximum corrosion resistance.
- 4 Interior hardware is marine grade stainless steel.

5 Rear Enclosure

- Made of flame-resistant UL94V0 plastic.
- All rear enclosures are glass-filled polyester for strength.
- Integral strain relief complies with ABYC requirements.
- Multiple positions allow for maximum installation flexibility.

TECH tip

50A Devices Explained

There are two categories of 50A devices: 50A 125V (50A 3-wire) and 50A 125/250V (50A 4-wire). The 4-wire devices have two "hot" legs, each carrying 50A 125V. These two categories are not interchangeable. A 3-wire plug must never be altered to insert into a 4-wire connector or receptacle.

ELCI inlets

Marinco®'s solution to the ABYC E-11 requirement is based on our industry-standard marine inlets. We have taken the best available technology and built it into our inlets to provide boat builders and owners with the safest, best looking and most durable solution possible. All of our ELCI Inlets are ignition protected to comply with ABYC standards.

We provide two modules in addition to the standard inlet. One houses the ELCI Marine Sensing Module, the other the breaker. Unlike competing systems, our ELCI Marine sensing module has a 3/4" diameter coil that accepts up to three 6 gauge conductors. This sensing module, which also incorporates a test circuit, is compatible with 30A 125V, 50A 125V and 50A 125/250V systems. There is a different breaker for 30A and 50A systems.

TECH tip™

ELCI ABYC Standards

Electrical current leakage is a serious safety concern for any boat connected to shore power. Because of this ABYC requirements now include specific measures for avoiding this danger. ABYC E-11.11.1 states "An Equipment Leakage Circuit Interrupter (ELCI) shall be installed with or in addition to the main shore power disconnect circuit breaker(s) or at the additional overcurrent protection as required by E-11.10.2.8.3 whichever is closer to the shore power connection.

EEL ShorePower Cordsets

One Hand. A simple twist. Full Power.

The EEL (Easily Engaged Lock) ShorePower Cordset has a patented, industry first, jaw-clamp design providing one-handed operation and a secure waterproof seal which completely eliminates the need for a locking ring. The EEL connection is built for the harshest environments and is UL approved. This easy-to-use cordset features a built-in cord light which serves as an alert to boaters when the cord is left plugged in. And, best of all, it works with your current inlet. In addition to cordsets with the EEL System, Marinc® also has a full set of Pigtail and Y adapters all using the new EEL technology.

Patented EEL Technology:

- Designed for use with standard inlets (NEMA)
- Single-handed operation
- No sealing ring required
- Patented jaw-clamp technology provides a watertight seal every time

Features & Benefits:

- Built-in cord light for added safety – alert light indicates if you are plugged into the dock and cord is powered
- Power indicator light on both ends informs you full power is flowing through the cord
- Meets and exceeds rigorous UL testing standards
- 30 Amp and 50 Amp cordset models, 12', 25' and 50' lengths in white and yellow available
- EEL product line includes connectors, pigtail, straight and "Y" adapters

Power Cord Plus® Cordsets

All Marincó® cordsets are made of the highest quality, marine grade construction with features you won't find on other power cords.

- 1 Watertight molded plug and connector for safety and durability
- 2 Heavy duty, super flexible marine grade cable (30 amp 10 gauge, 50 amp 6 gauge)
- 3 All models include a standard threaded ring for hook-up to ordinary threaded inlets
- 4 Corrosion resistant, nickel plated contacts
- 5 Power Indicator Light: Boatside connector features a molded-in LED light. When it glows red, you know you have power to the boat.
- 6 Contour Grip with Thumbprint Locator: Both plug and connector ends are molded to fit the contour of your hand. When the thumbprint is in the 12 o'clock position, the blades line up for easy connection.
- 7 Marincó's Easy Lock™ system: Quickly locks the cord set to the inlet in just 1/8 of a turn. The exclusive locking tabs engage slots built into all Marincó inlets (sold separately).

Cordset Accessories

Cord Clips

- Includes 6 cord clips with stainless steel mounting screws
- Keeps shore power cable out of the water
- Holds 10 gauge 30A cable
- Easy to install
- Use on deck or edge of dock
- Organize shore power cable

Part # CLIP

Railmount Cord Clips

- For 30A cords
- Organize shore power cords quickly and easily
- Can be used on tube or wire rails
- Packaged as set of 6 clips
- UV stable
- Practically unbreakable

Part # CLIP-01 black

Organizer Bag

- Heavy duty nylon zippered bag with handle
- Ideal for storing cordsets and adapters
- Dimensions 20" x 15" x 8"

Part # BAG

Cord Cover

- Keep shore power cables neat and bundled
- Holds 50A or 30A cordsets, can hold multiple cables
- UV resistant, machine washable marine grade fabric
- 24 ft

Part # CCVR-24 black

Carrying Strap

Bundle and organize your shore power cables or hoses with this durable and flexible nylon carrying strap. Its adjustable design fits around cordsets or hoses up to 9" in diameter while, the ergonomic, rubber handle makes carrying even larger 50 amp cord sets easy on your hand. A metal, reinforced grommet allows for hanging and storage.

Part # STRAP

Adapters

The Marinc® Shore Power Adapters give you more power hook-up flexibility and resolve a variety of dockside power center / boat side inlet power incompatibility problems.

TECH tip™

Choosing the Correct Adapter

Step 1: Boat Side – Identify your boat's Inlet Electrical System

The voltage and amperage should be printed on the outside cover of your existing boat inlet(s)

The voltage and amperage should be printed inside the boat Inlet(s) next to the blades

30A 125V

50A 125V

Check the blade orientation of the various inlets pictured and compare to your boat inlet(s)

50A 125/250V

Pay special attention to the differences in the 50A 125V and the 50A 125/250V. The blades look similar, but they are different. The plugs and receptacles for these systems are NOT interchangeable!!

Notice the additional grounding blade on the 50A 125/250V inlets.

IMPORTANT 50 AMP INFORMATION:

If you are connecting to 50A dockside power service, it is **CRITICAL** to know the dockside receptacle's voltage rating (50A 125V or 50A 125/250V). An adapter designed for 50A 125V will not plug into a dockside receptacle rated for 50A 125/250V service, and vice versa.

Step 2: Identify the Dock Side Power Source

50A 125/250V
Locking

Step 3: Choose a Marinc® Adapter from page 23–28

Match your boat side inlet(s) to the appropriate dock side receptacle or other power source. Adapter ends are color coded for easier selection.

Types of Adapters

Straight Adapters are high-quality, one-piece adapters similar in usage to Pigtail Adapters. However, they do not have sealing collars and are not recommended for use in wet locations. Use only in an enclosed, dry location, such as powering your boat from a 15A power receptacle inside your house.

Pigtail Adapters* allow you to connect from one dockside receptacle (or other power source receptacle) to one boatside inlet or equipment of dissimilar power configuration. These adapters are fully molded and equipped with Marinc®'s unique sealing collar (where indicated) and covers for use in wet locations.

"Y" Adapters* let you split one dock side receptacle between two boat inlets of similar or dissimilar power configurations. "Y" adapters are fully molded and equipped with Marinc®'s unique sealing collar and covers (where indicated) for use in wet locations.

The Reverse "Y" Adapter (Part # RY504-2-30) The reverse "Y" provides 50A 125/250V power when only two 30A 125V receptacles are available.

*Available with standard locking rings or with the new EEL quick locking system

Straight Adapters

Not recommended for use in wet locations.
Includes power LED.

RY504-2-30

DOCK SIDE

MALE PLUG
Attaches to dockside receptacle or cordset

BOAT SIDE

FEMALE CONNECTOR
Attaches to boat inlet or cordset

The Reverse "Y" Adapter has two male plugs with special power isolation circuitry for added safety. When one plug is connected to a receptacle, the circuitry isolates the second plug. The reverse "Y" provides 50A 125/250V power when only two 30A 125V receptacles are available.

Note: Reverse "Y" will NOT work with 50A, 125V, 3-wire inlets. Power is provided in both circuits to the 4-wire inlet, but the dock side receptacles limit the current in each circuit to 30A. The two 30A 125V receptacles must be supplied from a single power source providing 208V to 250V between them for proper operation.

Dockside 30A to 15A Adapter with GFCI

Part #

199128

- Provides safer hook-up to 30A dockside power
- Provides protection against harmful electric shock
- Reduces the possibility of fire
- Offers protection for up to 3 attached tools
- Corrosion resistant and rain-proof rated for outdoor use
- GFI trip level of 4-6 mA
- Can also be used for other outdoor, harsh environments such as construction sites or wherever ground fault protection is desired

DOCK SIDE

Note: A Ground Fault Circuit Interrupter (GFCI) limits the duration of an electrical shock to a period considered safe for healthy people. It does not prevent electric shock. This device does not protect against electric shock due to contact with both circuit conductors or a fault in any wiring supplying this device.

NEW

Marinco offers a complete line of plugs and receptacles designed exclusively for trolling motors and downriggers. Includes the NEW 70 Amp trolling motor plug.

Battery Direct Connect

45

Terminate up to 4 electronic instruments on each set of battery terminals.

Charging today's mobile devices on the go is a necessity and requires products built to withstand the marine environment.

The importance of a quality DC electrical system

There's an old axiom that states, "The strongest chain is only as reliable as its weakest link," and the same analogy can be applied to your boat's DC electrical system. Put it in a harsh salt water or fresh water environment, where a vessel's wiring and components are subjected to more concentrated abuse in one season than your family car would experience in five years, and it's easy to realize that small electrical problems can get out of hand very quickly.

Safety onboard starts with a reliable DC electrical system that is installed and designed with the proper high quality wiring, components and connections to fulfill all of your intended DC tasks. If you're tempted to take shortcuts when wiring your boat, don't, as these types of cost-cutting measures can come back to bite you at the worst possible moments, potentially compromising the safety of your boat and crew.

So, whether you ply fresh water lakes, back bays, coastal areas or make long distance blue water runs to the edge of the continental shelf, Marincor® offers a wide selection of high quality, low voltage DC electrical products designed specifically for the harsh marine environment.

Now you can spend more time enjoying your boating experience and less time dealing with unwanted electrical hassles.

SeaLink® 12 Volt

The SeaLink® 12 volt family of products are manufactured from corrosion resistant marine grade materials. Exclusive to SeaLink® products is a unique interconnecting system that securely locks the plug into the receptacle resulting in a positive and moisture-proof connection. The plug and receptacle feature optimized metal connection points for maximum conductivity.

ConnectPro® Charging & Trolling

The ConnectPro® trolling motor plug and receptacle is a revolutionary concept in trolling motor DC connections. The ConnectPro® system has superior electric current carrying capacity that eliminates problems that rob motors of power and reduce battery life. The ConnectPro® system features a locking plug and receptacle and spring clamping connection, which provides a secure electrical contact.

SeaLink® Deluxe 12 Volt Receptacle

- Watertight sealing cap
- Easy to install, with supplied mounting plate for front panel installation, or locking ring for rear access installation
- Compatible with standard 12V plugs
- Max rating is 20 amps

Part # 12VRC black
 Part # 12VRC.PG black w/gasket
 Part # 12VRCW white

SeaLink® Deluxe 12 Volt Receptacle

- Watertight sealing cap
- Easy to install with locking ring for rear access installation
- Compatible with standard 12V plugs
- No mounting plate
- Max rating is 20 amps

OEM # 12VRC.OEM black
 OEM # 12VRCW.OEM white

SeaLink® Deluxe 12 Volt Plug

- Moisture proof sealing ring
- LED power indicator light
- Interchangeable 10A fuse
- Internal strain relief and cord seal
- Compatible with standard 12V receptacles
- Max rating is 10 amps

Part # 12VPG
 OEM # 12VPG.OEM

SeaLink® Deluxe 12 Volt Receptacle & Plug

- 12VRC and 12VPG packaged together

Part # 12VPK

12VDUSB

12VDUSBW-B

SeaLink® Deluxe Dual USB Charger Receptacle

- 12V to 24V DC input
- 5V, 2.1 amp total output
- LED power indicator light for USB
- Water resistant cover protects against dust and water
- Insulated terminals included

Part # 12VDUSB black

SeaLink® Receptacle Mounting Bracket

- Bracket for under dash mounting of the SeaLink® or ConnectPro® receptacles
- Receptacle installs with rear mounting threaded nut
- Marine grade anodized aluminum
- Dimensions: 2" W x 2-1/2" H

Part # 12BKT

Boot

- For use with 12V products
- Creates a weatherproof seal

Part # 300275

Trolling Motor Adapter Terminal

- 6 gauge

Part # 12VPL.OEM

USB Port

- 6 ft
- USB extension cable with weatherproof cap

Part # USBA6
OEM # USBA6.OEM

SeaLink® Deluxe 12V Extension Cord

- Heavy duty 18 gauge wire, extends to over 6 feet
- Watertight cap
- Plug features an LED indicator light, moisture proof sealing ring, strain relief and built-in 10A fuse
- SeaLink® locking system
- Works with any standard 12V plug and receptacle

Part # 12VXT

SeaLink® Deluxe 12V Dual Outlet Cord

- Heavy duty 18 gauge wire, extends to over 1 foot
- Watertight caps
- Plug features an LED indicator light, moisture proof sealing ring, strain relief and built-in 10A fuse
- SeaLink® locking system
- Works with any standard 12V plug and receptacle

Part # 12VAD

3-Wire 70A Charging / Trolling System

70A Trolling Motor Receptacle **NEW**

- 70A continuous rating
- Universal design for 2 or 3-wire configuration 12V, 24V, 12/24V, 24/36V, 36V or 48V systems
- Floating pin design for maximum connectivity and durability
- Corrosion resistant, plated brass electrical components
- Watertight sealing cap
- Accepts up to 6 AWG wire

Part # 12VBR53
OEM # 12VBR53.OEM

70A Trolling Motor Plug **NEW**

- 70A continuous rating
- Universal design for 2 or 3-wire configuration 12V, 24V, 12/24V, 24/36V, 36V or 48V systems
- Floating pin design for maximum connectivity and durability
- Corrosion resistant, plated brass electrical components
- Integrated strain relief
- Keyed design with thumbprint locator
- Accepts up to 6 AWG wire

Part # 12VBPS3
OEM # 12VBPS3.OEM

70A Trolling Motor Plug & Receptacle **NEW**

- 70A continuous rating
- Universal design for 2 or 3-wire configuration 12V, 24V, 12/24V, 24/36V, 36V or 48V systems
- Floating pin design for maximum connectivity and durability
- Corrosion resistant, plated brass electrical components
- Receptacle contains watertight sealing cap
- Plug contains Integrated strain relief and keyed design with thumbprint locator
- Accepts up to 6 AWG wire

Part # 12VCP53

3-Wire ConnectPro® Charging / Trolling System

PATENTED

ConnectPro® Receptacle

- Universal design for 2 or 3-wire configuration 12V, 24V, 12/24V, 24/36V or 36V systems
- Watertight sealing cap
- Corrosion resistant, plated brass electrical components
- Drain holes in receptacle keep water away from electrical components
- Perma-Lock™ screw terminals will not loosen under extreme hull vibration
- Standard 1-1/8" diameter mounting hole
- Easy to install, with supplied mounting plate for front panel installation, or locking ring for rear access installation
- Accepts 10 and 8 AWG wire
- Easily replaces other trolling motor plugs and receptacles
- Max rating is 40 amps

Part # 12VBR with mounting plate
OEM # 12VBR.OEM without mounting plate

ConnectPro® Plug

- O-ring seal for waterproof connections
- Weather resistant plug cover
- Corrosion resistant, plated brass electrical components
- Accepts 16 to 8 AWG wire
- Ergonomic contoured grip for easy hook-up and ground blade alignment
- Max rating is 40 amps

Part # 12VBP
OEM # 12VBP.OEM

ConnectPro® Receptacle & Plug

- 12VBR and 12VBP packaged together

Part # 12VCP

6 Gauge ConnectPro® Wire Receptacle Adapter

- Allows 6 AWG wire connection to ConnectPro® receptacle
- Corrosion resistant, plated brass electrical components

Part # 12VBRAD
OEM # 12VBRAD.OEM

ConnectPro® Receptacle, Plug & 6 Gauge Adapter

- 12VBR and 12VBP and 12VBRAD packaged together
- Max rating is 40 amps

Part # 12VCP6

2-Wire ConnectPro® Charging / Trolling System / Downrigger

ConnectPro® Receptacle

- Works with 12V, 24V, or 36V 2-wire systems
- For front mount panel installations
- Weather resistant sealing cap
- Drain holes in receptacle keep water away from electrical components
- Perma-Lock™ screw terminals will not loosen under extreme hull vibration
- Fits standard 1-1/8" diameter mounting hole
- Accepts up to 10 AWG wire

Part # 12VBR52

OEM # 12VBR52.OEM

ConnectPro® Plug

- O-ring seal for waterproof connections
- Weather resistant plug cover
- Corrosion resistant, plated brass electrical components
- Accepts 16 to 8 AWG wire
- Ergonomic contoured grip for easy hook-up and ground blade alignment
- Max rating is 40 amps

Part # 12VBPS2

OEM # 12VBPS2.OEM

ConnectPro® Receptacle & Plug

- 12VBR52 and 12VBPS2 packaged together

Part # 12VCPS2

3-Wire 30 Amp 125V Locking Charging / Trolling System

Male Plug

- Short housing, black nylon with internal strain relief system and recessed fasteners

Part # 305BP

OEM # 305BP.OEM

Female Connector

- Short housing, black nylon with internal strain relief system and recessed fasteners

Part # 305BC

Receptacle

- Corrosion resistant reinforced nylon.
- Accepts 8 AWG stranded wire or up to 6 AWG with spade terminals

Part # 305CRRB

OEM # 305CRRB.OEM

4-Wire 12/24V Locking Charging / Trolling System

The 4-wire Trolling/Charging System eliminates the need for a charge/run switch. Install the receptacle on the boat, mount the black trolling motor plug on the trolling motor, and the red charger plug on the leads of the battery charger. Simply plug in the black plug to troll, or plug in the red plug to charge.

Charger Plug (Male)

- Accepts up to 10 AWG wire
- Red

Part # 2018BP-12

Trolling Motor Plug (Male)

- Connects to trolling motor
- Jumpered internally to supply 12V & 24V power to the trolling motor when plugged into the receptacle
- Accepts up to 8 AWG wire
- Max rating is 60 amps
- Black

Part # 2018BP-24
OEM # 2018BP-24.OEM

Receptacle & Bracket

- Spring loaded flip lid cover and 2018BR receptacle, pre-assembled

Part # 2018BR-MB

Bracket

- Spring loaded flip lid cover, without receptacle

Part # 2018MB
OEM # 2018MB.OEM

Trolling-Charging System Package

- Includes the 2018BP-12, 2018BP-24, and 2018BR-MB

Part # 2018PKG

Receptacle

- Glass-reinforced corrosion resistant nylon. Accepts 8 AWG stranded wire or up to 6 AWG with spade terminals.

Part # 2018BR
OEM # 2018BR.OEM
OEM # 2018BR.OEM.BPS (case pack)

Battery Direct Connect™ Multi Connection Battery Terminals

- Terminate up to four electronic instruments on each set of terminals
- Comes complete with quick-connect terminals
- Positive molded in red, negative molded in black
- All one-piece, no screws or parts to lose
- Cover snaps tight when closed
- Meets ABYC standard E-10.8

Part # 12VTR
OEM # 12VTR.OEM

Battery Direct Connect™ Details

POWER CONVERSION

Charge Pro® Portable Battery Chargers

48

The Charge Pro® Portables offer a versatile charging solution that you can take with you in your car, truck, boat, motorcycle or anywhere else you need power. Even your classic car can be charged with the 6V mode.

Charge Pro® Onboard Battery Chargers

48

These new onboard chargers have the same housing and mounting dimensions as our traditional Charge Pro® Guest chargers with a number of performance enhancements.

GUEST Portable Battery Chargers

50

Take the charger to the battery with the Guest portable charger. Charges and maintains a full charge without the fear of overcharging or boiling electrolytes.

POWER CONVERSION

GUEST Onboard Battery Chargers

50

Triple and single bank designs with models that are compatible with 12V or 24V systems.

1.5 Amp Charge Pro® Maintainer

51

Keep your battery charged with this highly reliable, Guest 1.5 Amp maintainer. Extends battery life and will charge, monitor and re-charge your battery if the voltage drops below 12.9V. The maintainer can be safely connected to the battery for short or long periods of time.

Battery Charger Inlets

51

Front mount and rear mount inlets are compatible with the ConnectCharge Plug. Eliminates rewiring the inlets and saves time and money.

Charge Pro® Battery Chargers

Marinco® has taken the best of their former Guest brand waterproof chargers and has added a host of features and technology for ultimate performance and longevity in the marine environment. Digital microprocessor controlled, the Charge Pro® chargers provide fast, accurate, efficient and full battery charging. They automatically monitor battery power and begin the charge cycle when power is low or every 14 days. Charge Pro® features include universal input (90-265V AC), IP65 rating, for flooded lead acid or AGM batteries. These new chargers meet stringent industry standards including UL, CSA, ABYC, USCG, FCC and the new CEC standard.

Charge Pro® Portable Battery Chargers

The Charge Pro® Portables offer a versatile charging solution that you can take with you in your car, truck, boat, motorcycle or anywhere else you need power. Even your classic car can be charged with the 6V mode. The portables come with two sets of cables—one with ring terminals and one with alligator clips.

- For use with flooded, AGM and Gel batteries
- Microprocessor controlled for accurate, efficient charging
- Intuitive operation
- 120/230V AC 50/60Hz input
- Models: 6/12V, 1.1 Amp & 4.3 Amp
- IP65 for harsh marine and industrial environments—moisture, salt, shock and vibration tested
- Meets global industry standards including UL, CSA, ABYC, FCC, California efficiency regulations (CEC)
- 4 ft DC cable connects to 2 ft lead with ring terminals or 2 ft lead with alligator clips (both included)

Easy to read label

NEMA 1-15P

Versatile

Works with 6V and 12V batteries and includes both alligator clips and ring terminals.

Rugged

The scratch and water resistant housing makes the Charge Pro ideal for indoor and outdoor use.

Simple

One button operation makes charging easy. Simply select your battery type and voltage.

Safe

Automatic protection against short circuit overcharge, and extreme temperatures.

Charge Pro® Battery Chargers

These onboard chargers have the same housing and mounting dimensions as our traditional Charge Pro® Guest chargers with a number of performance enhancements.

- For use with flooded, Gel and AGM batteries
- Microprocessor controlled for accurate, efficient charging
- Universal input 120/230V for go-anywhere freedom
- Isolated outputs
- Outputs can be put in series or parallel for higher voltage or current
- IP68 for harsh marine and industrial environments—moisture, salt, shock and vibration tested
- Meets global industry standards including UL, CSA, ABYC, FCC, California efficiency regulations (CEC)
- Footprint and mounting holes are same as former Charge Pro® Guest Chargers
- ConnectCharge™ Plug for easy assembly to inlet (Part #150CCI) with no wiring

1.5 Amp ChargePro® Maintainer NEW

Keep your battery charged with this highly reliable, Guest 1.5 Amp maintainer. Extends battery life and will charge, monitor and re-charge your battery if the voltage drops below 12.9V. The maintainer can be safely connected to the battery for short or long periods of time. To increase versatility the maintainer comes with alligator clips and ring terminals for the output cable. This maintainer will charge smaller batteries and maintain batteries up to 150Ah (group 31).

- Ideal for sport fishing boats, ski boats, jet ski's, ATV's, automobiles, tractors, riding lawn mowers and more
- For Wet, Gel and AGM batteries
- Charge batteries 1.2 Ah to 40 Ah
- Maintain batteries 1.2Ah to 150 Ah
- Energy savings mode automatically shuts off the charger when the battery is charged. The charger periodically monitors the battery and turns back on when the battery falls below 12.9V.
- Maintainer can safely stay connected to the battery for long periods of time
- LED's let you know when the Power is ON, battery is being charged and when charging is complete.
- Includes ring terminals and alligator clips for connection to the battery
- Weather resistant, IP65
- 3-wire AC plug, NEMA 5-15P
- 3 year warranty
- Meets UL 1236 and CSA Standards, cETLus

BATTERY MANAGEMENT

Dynaplates

54

Improve the performance of electronics and reduce RF interference. Deters electrolysis and galvanic corrosion.

Universal Mount Switches

55

Longer stud length for easier assembly and cable routing.

BATTERY MANAGEMENT

Battery Selector Switches

55

Durable polycarbonate case. Available with or without Alternator Field Disconnect. For 6V, 12V, 24V, or 36V systems.

Heavy-duty Diesel Power Battery Switches

55

Constructed with heavy-duty copper sweep contacts to ensure positive circuit control. Features Alternator Field Disconnect to protect the electrical system during switching.

Battery Management systems protect and support rechargeable batteries by extending the charge and life cycle of your batteries.

Dynaplates for Hull Bonding & Grounding

- Improves performance of electronics and reduces RF interference
- Offers the best path for hull bonding without long runs of copper foil
- Deters electrolysis and galvanic corrosion
- Sintered porous bronze sphere construction for maximum conductivity in a compact size
- Low drag, non-fouling shape
- Easy to clean with wire brush
- Conforms to ABYC standards
- Mounting hardware included
- Gold plated mounting bolt
- Bronze mounting nuts

Choosing a Battery Switch

ABYC requires a battery switch on every boat with a battery over 800 Cold Cranking Amps (CCA). This requirement exists so the potentially destructive energy in the batteries can be isolated in the event of a fire.

Universal Mount Switches

- Longer stud lengths for improved assembly and easier cable routing
- Built with heavy-duty copper sweep contacts to ensure positive circuit control
- Rugged internal components protected by a tough, impact resistant polycarbonate housing that is impervious to the elements
- Cable Lug Size: 3/8"
- Dimensions: 5.0" x 2.75"

Battery Switch Operation Diagrams

As more and more electronics and electrical accessories are added to your boat (autopilot, refrigeration, etc.) the use of multi-batteries becomes a necessity. Guest components allow you to set up the system (from simple to complex) for your boat's application. The following diagrams are for use in identifying and designing the right system for your boating needs.

Single battery

Installation: To shut off all power at source. Recommended installation by approved authorities.

Two battery with out isolator

Installation: To select a starter battery and ship service battery. Manually isolates each battery, parallels both batteries for emergency start, master disconnect, manually selects batteries for charging.

Two battery with isolator

Installation: Isolator automatically selects lower charged battery to be charged first. Full battery can't discharge to drained battery. Dedicated system, no flexibility, no emergency parallel or disconnect function.

Two battery with emergency parallel

Installation: An isolator automatically isolates each battery, lower charged battery will automatically be charged first. Two different size batteries can be used, larger for ship services, smaller for engine cranking. Switch selects usage, master disconnect, emergency parallel function.

One battery selector switch, one On/Off selector switch automatic battery isolation and automatically charges three batteries

Installation: Use for sailboats and trawlers. Third battery isolated from other ship circuits. All batteries being automatically charged while running through isolator. To be used for refrigeration or other heavy load devices. Isolator protects other batteries.

Switch selector usage:

- 1. Master disconnect 2. Emergency parallel function

Adding automatic battery charger/converters to system

Installation: At dockside multi-bank charger built in isolator which will automatically charge lower battery.

Three batteries, one battery selector switch, one On/Off or selector switch, two alternators, one isolator

Installation: Isolator separates both alternators so both alternators will charge simultaneously. Automatically charges lowest battery first. All batteries can be used for start, third battery, ship's source.

TECH tip™

Alternator Field Disconnect (AFD)

Allows selection of any position, including "Off," without damage to alternator or electrical system. AFD is required on some electrical systems.

- Heavy-duty copper sweep contacts
- Positive click-stop on all positions
- "Make before break" contacts allow selection of all positions except "Off" while engine is running
- New design is easy to retrofit into existing hole patterns
- Use with 6V, 12V, 24V or 36V systems
- Built-in skirt protects connections
- Surface or rear panel mounting
- Marine grade construction

Important Note: The boater's electrical needs and problems should be discussed with your boatyard's electrical technician.

Exclusive flat 360 "sweep" contact design provides up to 60% more contact area than other switch designs.

WIPER SYSTEMS

Wiper Motors & Kits

60

Marinco® motors are split into three categories, Standard, Heavy-Duty, and Heavy-Duty Plus, with the categories being defined by the power range of the motors. Within the three categories, there are motors designed for interior or protected installations, and motors designed for exterior installations. We offer wiper motors for all windshield sizes up to 45", which could be covered by a 30" arm and 30" blade combination, driven by a 3.0 motor.

Wiper Arms

69

Wiper arms are available in Standard, Deluxe, and Premier styles and the primary construction material in all wiper arms is stainless steel. Deluxe arms are used on Standard and Heavy-Duty motors. The arms are available in a wide range of sizes, in both black and stainless steel finish, and regular and pantographic models. Pantographic arms use a set of two arms joined together to give a flatter and somewhat wider sweep pattern.

WIPER SYSTEMS

Wiper Blades

73

Standard, Premier, and Deluxe wiper blades are offered in different sizes and styles to fit all of the different types of wiper arms. Premier and Deluxe styles have stainless steel frame construction and high-end silicone rubber squeegees. For maximum performance of all blade styles, replacement of wiper blades is recommended every 6 months.

Windshield Washer Kits

75

A full line of easy-to-install windshield washer kits are available.

Wiper assembly systems ensure your visibility remains clear through a storm or vicious passages.

Wiper Motors

The motor choice is based primarily on the size of the windshield and where the motor is to be installed, either in an exterior or interior location. Marincó® motors are split into three categories, Standard, Heavy-Duty, and Heavy-Duty Plus, with the categories being defined by the power range of the motors. Within the three categories, there are motors designed for interior or protected installations, and motors designed for exterior installations. We offer wiper motors for all windshield sizes up to 45", which could be covered by a 30" arm and 30" blade combination, driven by a 3.0 motor.

The Standard motor category includes the STD, WMW, and 500, which are all designed for light duty use, defined as being able to drive a 14" arm and a 14" blade.

When coverage of a larger windshield is required, Marincó® offers the Heavy-Duty motors, which are capable of driving a

wide range of arm and blade sizes, up to a 26" x 26" Deluxe arm and blade combination, which would cover windshields up to 39". The 1000 motor can pull up to a 16" x 16" Deluxe arm and blade combination. The MRV is built for interior or well-protected locations, and has the power to pull a 22" x 22" Deluxe arm and blade combination. The 1.5 motor has the power to pull a 22" x 22" Deluxe arm and blade combination like the MRV, but is waterproof and built for exposed installations. The 2.5 motor has the power to pull a 26" x 26" Deluxe arm and blade combination and is waterproof for exposed installations.

The 3.0 motor is the motor that makes up the Heavy-Duty Plus category. This motor has an external linkage shaft drive that gives it the power and torque to drive a 30" Premier pantographic arm and Premier blade combination.

Choosing the Right Motor

| | Model | Voltage | Speeds | Stall Torque/ Stall Current | Compatible Blade Lengths | Available Shaft Lengths | Sweep Angles | Housing |
|---|-------|-----------|---|--------------------------------|---|-------------------------------|--|---|
|  | 3.0 | 12V & 24V | Single | 165 in-lbs / 12.5-14.5 amps | 30" Premier Plus single or pantographic | 2.5" 3.5" | Factory preset to 110° Adjustable to 45°, 60° | External linkage - no housing |
|  | 2.5 | 12V & 24V | 2 speed | 139 in-lbs / 9-10.5 amps | 26" Deluxe 24" Premier | 1.5" 2.5" | Factory preset: 80° or 110° Adjustable: 45° or 60° | Fully sealed powder coated aluminum |
|  | 1.5 | 12V & 24V | 2 speed | 109 in-lbs / 11.5-13 amps | 22" Deluxe 20" Premier | 1.5" 2.5" | Factory preset: 80° or 110° Adjustable: 45° or 60° | Fully sealed powder coated aluminum |
|  | 3000 | 12V | 2 speed | 159 in-lbs / 10.2-12.2 amps | 26" Deluxe 26" Premier | 1.5" 2.5" | Factory preset: 80° or 110° Adjustable to 40°, 50°, 60°, 70°, 80°, 90°, 100° or 110° | Fully sealed aluminum |
|  | 1000 | 12V | Single | 55 in-lbs / 9.8-10 amps | 16" Deluxe 18" Premier | 1.5" 2.5" | Factory preset: 80° or 110° Adjustable: 50°, 65°, 80° or 110° | Fully sealed, UV stabilized hi-temp thermoplastic |
|  | MRV | 12V & 24V | 2 speed (but can be operated as 1) | 109 in-lbs / 11.5-13 amps | 22" Deluxe 20" Premier (at 80° sweep) | 1.5" 2.5" 3.5" | Factory preset: 80° or 110° Adjustable: 45°, 60°, 80° or 110° | Corrosion resistant cast housing |
|  | 500 | 12V | Single | — | 14" Deluxe | 2.5" | Factory preset: 80° or 110° | Fully sealed, UV stabilized hi-temp thermoplastic |
|  | WMW | 12V | Single | — | 14" Deluxe | 2.5" | Factory preset: 110° | Chrome plated brass case |
|  | STD | 12V | Single | — | 14" Deluxe | 2.5" 3.5" | Factory preset: 80° or 110° Adjustable: 80° or 110° | Corrosion proof aluminum alloy case |

3 YEAR WARRANTY

Heavy Duty Plus 3.0 Motor

The Heavy Duty Plus 3.0 Motor is Marinco®'s only external linkage motor. This design easily powers a 30" Premier arm and 30" Premier blade combination to provide coverage up to 45" of windshield area.

- Available in two shaft lengths: 2.5" and 3.5" (knurled arm fitting adds 2" to overall length)
- Tapered knurled drive shaft
- Factory pre-set sweep angle of 110°, with easy adjustment to 45° or 60°
- Sealed 6" wire leads, 16 AWG
- For interior installations
- Adjustable right or left self parking
- 18 mm diameter shaft
- Measures approximately 8.5" L x 4.625" W x 4.375" D (See below for detailed dimensional drawings)
- Stall torque: 165 in-lbs (190 kgf/cm; 18.6 Nm)
- Stall current: 12.5–14.5 amps
- No load current: 0.8–2.0 amps
- Recommended fuse: 6 amp fuse
- Available in 12V and 24V models
- Coast to park
- RF shielded circuitry

| | Voltage | Sweep | OEM # |

CE

2.5 Waterproof Wiper Motor

- Fully sealed powder coated aluminum waterproof base and housing
- Powers a 26" Deluxe arm and Deluxe blade combination or a 24" Premier arm and Premier blade combination
- Available in two shaft lengths: 1.5" and 2.5" (includes .5" length of knurled arm fitting)
- Factory pre-set sweep angles of 80° or 110°, with easy adjustment to 45° or 60°
- Chrome plated solid brass knurled drive nut with brass and stainless steel drive shaft
- Two speed motor
- Sealed 6" wire leads, 16 AWG
- Adjustable right or left self parking
- .625" diameter shaft (16 mm)
- Available in 12V and 24V models
- Coast to park
- RF shielded circuitry
- Retail version includes 6 amp fuse and holder (operating switch not included)
- Measures approximately 7.875" L x 4.25" W x 3" D (see below for detailed dimensional drawings)
- Stall torque: 139 in-lbs (160 kgf/cm; 15.7 Nm)
- Stall current: 9.0-10.5 amps
- No load current: 1.0 -1.6 amps

1.5 Waterproof Wiper Motor

- Fully sealed powder coated aluminum waterproof base and housing
- Powers a 22" Deluxe arm and 22" Deluxe blade combination or a 20" Premier arm and 20" Premier blade combination
- Available in three shaft lengths: 1.5" and 2.5" (includes .5" length of knurled arm fitting)
- Factory pre-set sweep angles of 80° or 110°, with easy adjustment to 45° or 60°
- Chrome plated solid brass knurled drive nut with brass and stainless steel drive shaft
- Two speed motor
- Sealed 6" wire leads, 16 AWG
- Adjustable right or left self parking
- .625" diameter shaft (16 mm)
- Available in 12V
- Coast to park
- RF shielded circuitry
- Retail version includes 5 amp fuse and holder (operating switch not included)
- Measures approximately 7.75" L x 4" W x 2.75" D (see below for detailed dimensional drawings)
- Stall torque: 109 in-lbs (125 kgf/cm; 12.3 Nm)
- Stall current: 11.5-13.0 amps
- No load current: 0.5-1.2 amps
- Replaces AFI 2000 motor

Hand-operated Wiper Blade

- Chrome-plated brass handle
- Includes stainless steel 7-1/2" to 12" adjustable wiper arm, 11" blade, and all parts for installation
- Economical—an inexpensive alternative to wiper motor kit
- Requires 7/16" diameter hole for installation
- Can be installed up to 7/8" thick material
- For use on flat windshields only

Part # 31000

OEM # 33101 Replacement blade

Wiper Arms

Wiper arms are available in Standard, Deluxe, and Premier styles and the primary construction material in all wiper arms is stainless steel. Standard arms are used with Standard blades and can only be used with the line of Standard motors, while the Deluxe arms are used on Standard and Heavy-Duty motors. When choosing arms (and blades) it is very important to use only the recommended lengths for the motor that you are using.

The arms are available in a wide range of sizes, in both black and stainless steel finish, and regular and pantographic models. Pantographic arms use a set of two arms joined together to give a flatter and somewhat wider sweep pattern. The Deluxe arms are available in a polished stainless steel finish or a black powder-coated finish. Premier arms are the top of the line product in this category, utilizing heavy-duty stainless steel tubing and components, and they can only be used with the Heavy Duty and Heavy Duty Plus motors. Premier arms come in adjustable length sizes, ranging from 10" to 30", in both regular and pantographic versions. The longer length Premier arms (25"-30" long) have been designed for added strength and have a tapered wiper shaft fitting made especially to fit the larger, more powerful 3.0 wiper motor. These arms also have a saddle style tip for a stronger connection with the longer length Premier blades (26", 28", and 30" lengths).

Premier arms are also available as "wet arm" versions, with the water hose and sprayer nozzle built into the wiper arm. All that is needed is a water delivery system that the arm can be tied into. For those wanting a windshield washer system for the Deluxe arms, there is a complete washer kit system that is made especially to fit the Deluxe arms.

Wiper Arm Compatibility Chart

Add-On Windshield Washer Kits

- Can be used on new or existing Deluxe wiper arm and blade sets
- Kit includes parts to outfit two wiper arms
- Sprayer fittings (kit includes two) each have four adjustable brass nozzles to provide maximum spray coverage for most any windshield
- Plastic parts are numbered to make installation easy

Complete Windshield Washer Kit

Includes:

- Water tank with mounting bracket
- 12 volt pump motor
- Under deck tee fitting
- Thru deck fitting and hardware
- Below deck clear tubing (16 ft.)
- Above deck black tubing (6 ft.)
- Large and small rivet clips
- Wiper arm clips
- Sprayer fittings with clamps

Part # 33505

OEM # 33515

Below Deck Windshield Washer Kit

Includes:

- Water tank with mounting bracket
- 12 volt pump motor
- Under deck tee fitting
- Thru deck fitting and hardware
- Below deck clear tubing (16 ft.)

OEM # 33513

Above Deck Windshield Washer Kit for One Small Arm

Includes:

- Small rivet clip
- Wiper arm clips
- Sprayer fitting with narrow clamp
- Thru deck fitting
- Above deck black tubing (6 ft.)

OEM # 33517

Intelligent Wiper Switch

Microcontroller based "intelligent" switch provides all necessary wiper motor functions in one small component.

- Settings for two continuous speed functions and three intermittent speed functions (2, 4, or 8 second delay)
- Washer system operation function
- Blinking LED lights in switch indicate operating function
- Works with 12V or 24V DC motors
- Fits standard switch size openings, requires 2.65"/67.5 mm depth
- Includes one ten pole connector with female pins and two female quick-connects

Single Motor **Part # 76030** **OEM # 76130**

HORNS

Hidden Horns

79

Marinco, the inventor of the first below-deck horn offers a complete line of below deck horn products.

Compact Horns

82

Marinco compact electric horns feature a low profile design and a lower frequency which provides a deeper sound.

HORNS

Electric Trumpet Horns

84

Classic design electric trumpet horns feature a lower frequency which provides a deeper sound.

Air Trumpet Horns

85

Classic design, featuring solid brass construction with a non-corrosive LEXAN® polycarbonate diaphragm.

Marinco® Horns

Marinco® is the leading supplier of horns to the marine industry, with over fifty years of experience in designing and manufacturing sound devices specifically for use in harsh marine environments. Stainless steel is used for all critical components such as trumpets, motor cover, diaphragms, and assembly and mounting hardware. In the case of the XLP trumpet horns, the horn is given extra protection through the complete over-molding of the internal motor cover housing. It is this extra process that provides the added protection needed to back up the five-year warranty.

Marinco® offers a complete line of marine horn products designed to meet almost any need, including electric and air trumpet horns, compact horns, electric and air below deck horns, and a comprehensive line of drop-in horns with a wide assortment of grill options. After developing the first below deck horn for the marine industry in the late 1980's, the offering of that product line has continued to expand.

- Meets the ABYC Regulation #A23 for boats up to 12 meters
- Meets the U.S. Coast Guard's C.O.L.R.E.G.S. and U.S. Inland Navigation Rules, Annex III Regulations for boats up to 20 meters
- Listed in the NMMA's Certification Program Type Accepted
- Horns are set at a lower frequency to provide greater range as the sound travels across the water

Marinco® Horn Relative Loudness Comparison Chart

TECH tip

Electromagnetic Interference Explained

In order to operate, an electric horn rapidly makes and breaks an electric circuit. This operation creates electromagnetic disturbance, which may cause electrical "noise" in communications equipment. Because a horn is only used temporarily, any interference in electronic equipment is stopped when the horn is turned off.

The International Marine Certification Institute (IMCI), which certifies boats to the European Community Regulations (CE), has determined that boats using electric horns can comply with CE requirements on electromagnetic compatibility provided the above message is given to the boat owners in their manual.

Marinco®, the inventor of the first below deck horns, offers a full line of below deck horn products. Concealed horns utilize an upright horn installation and a large grill opening to offer greater sound volume. Drop-in Hidden Horns use a fabric lined grill for water-resistant installations. The concealed trumpet horns are all air horns and provide the maximum amount of sound available in a below deck horn installation.

Marinco’s Drop-in Hidden Horns combine a number of desired features into one unit including:

- Simple, drop-in installation
- Stylish snap-on grill with water-resistant fabric
- Authentic marine sound
- Easy aftermarket retrofit

Important: Please note the space requirement dimensions on some of the below deck models to ensure there is adequate room on the interior of the mounting area to house the horn assembly. Concealed horn models require a minimum 45° mounting angle to ensure proper drainage.

Low Profile Hidden Horn

With Black and White Grills

- New louder dB(A) rating: 111 at one meter
- Fundamental frequency: 360±20Hz
- 12V DC
- Easy installation: 2.75" diameter hole x 1" deep
- Maximum amp draw: 4 amps
- Comes with both white ASA and black ABS screw-in grills
- Grills have water resistant fabric liners
- Mounts from the outside, grill screws on for easy install
- Easy retrofit

Part # 10080

Without Grill

- Same as 10080 without grill
- When purchasing bulk version, grill must be ordered separately

OEM # 11080

((Lower Frequency for a Deeper Sound))

Mini Compact Electric Horn

- dB(A) rating: 106 at one meter
- Fundamental frequency: 430±20Hz
- 12V DC
- Dimensions: 3" L x 3.25" W x 1.75" H
- Maximum amp draw: 3 amps
- Totally sealed sound unit
- Type 304 stainless steel cover, diaphragm, mounting bracket

Part # 10035
 OEM # 11035

((Lower Frequency for a Deeper Sound))

Mini Twin Electric Horn

- dB(A) rating: 109 at one meter
- Fundamental frequency: 490±20/430±20Hz
- 12V DC
- Dimensions: 3" L x 8" W x 1.75" H
- Maximum amp draw: 6 amps
- Type 304 stainless steel covers, diaphragms, and mounting bracket

Part # 10001
 OEM # 11001

((Lower Frequency for a Deeper Sound))

International Shorty Horn

- dB(A) rating: 123 at one meter
- Fundamental frequency: 310±20 Hz
- 12V DC
- Dimensions: 4.25" L x 5" W x 6.5" H
- Maximum amp draw: 4 Amps
- Stainless steel diaphragm and mounting bracket
- ABS, triple chrome-plated housing

Part # 10036

Single Trumpet Electric Horn

- dB(A) rating: 118 at one meter
- Fundamental frequency: 370±20Hz
- Dimensions: 16.5" L x 4" W x 4.75" H
- Maximum amp draw: 5 amps
- 100% stainless steel exterior
- Type 304 stainless steel diaphragm

Premium XLP

12V Part # 10028XLP OEM # 11028XLP
 24V Part # 10017XL OEM # 11017XLP Max amp draw: 2.5 amps

5 YEAR WARRANTY

((Lower Frequency))
 ((for a Deeper Sound))

Dual Trumpet Electric Horn

- dB(A) rating: 123 at one meter
- Fundamental frequency: 370±20/310±20Hz
- Dimensions: 18.5" L x 8" W x 5" H
- Maximum amp draw: 10 amps
- 100% stainless steel exterior
- Type 304 stainless steel diaphragm

Premium XLP

12V Part # 10029XLP OEM # 11029XLP
 24V Part # 10018XL OEM # 11018XLP Max amp draw: 5 amps

Compact Single Trumpet Electric Horn

- dB(A) rating: 110 at one meter
- Fundamental frequency: 420±20Hz
- 12V DC
- Dimensions: 14" L x 3.5" W x 4" H
- Maximum amp draw: 3.5 amps
- Compact design makes it easier to install in smaller spaces
- 100% stainless steel exterior
- Type 304 stainless steel diaphragm

Part # 10010

((Lower Frequency))
 ((for a Deeper Sound))

Compact Dual Trumpet Electric Horn

- dB(A) rating: 115 at one meter
- Fundamental frequency: 420±20/370±20Hz
- 12V DC
- Dimensions: 16" L x 7.5" W x 4" H
- Maximum amp draw: 7 amps
- Compact design makes it easier to install in smaller spaces
- 100% stainless steel exterior
- Type 304 stainless steel diaphragm

Part # 10011

All of our air horns produce sound levels ranging between 120dB and 127dB, which means all of our air horns meet the ABYC and NMMA regulations for boats up to 20 meters/66 feet. Both 12V and 24V compressors are CE listed.

Single Trumpet Mini Air Horns

- dB rating: 126 at one meter, 1/3 octave band
- Fundamental frequency: 630±15Hz
- Dimensions: 9.5" L x 3.5" W x 3.5" H
- Maximum amp draw: 20 amps (12V DC)
- Solid brass construction with non-corrosive LEXAN® polycarbonate diaphragm
- Includes compressor, air tubing, fittings, and hardware

Chrome Plated **Part # 10107** **OEM # 11107**
 White Epoxy Coated **Part # 10104** **OEM # 11114**

Air Compressor included

Dual Trumpet Mini Air Horns

- dB(A) rating: 127 at one meter, 1/3 octave band
- Fundamental frequency: 630±15/525±15Hz
- Dimensions: 9.5" L x 5" W x 3.75" H
- Maximum amp draw: 20 amps (12V DC)
- Solid brass construction with non-corrosive LEXAN® polycarbonate diaphragm
- Includes compressor, air tubing, fittings, and hardware

Chrome Plated **Part # 10108**

Air Compressor included

Single Trumpet Air Horns

- dB rating: 120 at one meter, 1/3 octave band
- Fundamental frequency: 315±15Hz
- Dimensions: 17" L x 3.75" W x 3.75" H
- Maximum amp draw: 20 amps (12V DC), 10 amps (24V DC)
- Solid brass construction with non-corrosive LEXAN® polycarbonate diaphragm
- Includes compressor, air tubing, fittings, and hardware

12 Volt **Part # 10105**
 24 Volt **Part # 10524**

Air Compressor included

Dual Trumpet Air Horns

- dB rating: 121 at one meter, 1/3 octave band
- Fundamental frequency: 375±15/315±15Hz
- Dimensions: 17" L x 7" W x 3.75" H
- Maximum amp draw: 20 amps (12V DC), 10 amps (24V DC)
- Solid brass construction with non-corrosive LEXAN® polycarbonate diaphragm
- Includes compressor, air tubing, fittings, and hardware

12V Chrome Plated **Part # 10106** **OEM # 11106**
 12V White Epoxy Coated **Part # 10122**
 24V Chrome Plated **Part # 10624**
 24V White Epoxy Coated **Part # 12224** **OEM # 22224**

Air Compressor included

Air Compressor

- Replacement compressor fits all Marinco® and AFI™ Air Horns
- Maximum amp draw: 20 amps (12V DC), 10 amps (24V DC)
- Produces 9–11 PSI
- Dimensions: 2.625" D x 5" L
- Includes mounting bracket

12V **OEM # 10102**
 24V **OEM # 10224**

LIGHTING

Precision Wireless Controlled Spotlight

88

Controlled by wireless remote control. Provides 370 degree sweep and 120 degree tilt. Designed for harsh marine environments, it is moisture, salt, and vibration resistant.

IP67 Stainless Steel Spot/Floodlight

89

Wireless remote communication. Stainless steel construction.

5" Stainless Steel Spot/Floodlight

89

Remote control / joystick operated stainless steel construction.

LIGHTING

Deck Lamps

90

State-of-the-art free form lens reflector technology allows for 30% more light output than comparable 55W lamps.

Docking Lights

91

Compact flush mount docking lights for a variety of applications.

Proper lighting is necessary for safety and operational activities aboard vessels.

Precision Wireless Controlled Spotlight

- Universal 12/24 volt circuit with bright 100W, H3 halogen bulb
- UV resistant, IP56 Weatherproof ABS housing and Lexan® lens
- O-ring sealed housing, designed for the harsh marine environment – moisture, salt, shock and vibration tested
- Universal snap-in mounting system (can be mounted upside down)
- Super-quiet, all-weather motor with limit stops provides a full range of coverage
- 370° sweep and 120° tilt (75° up and 45° down)
- One touch auto sweep and S.O.S. function
- Wireless dash mount remote standard; (hard wired & handheld remotes are optional)
- 3-Year limited warranty
- Available in white, black and chrome

Universal Halogen Deck Lamps

State-of-the-art free form lens reflector technology allows for 30% more light output than comparable 55W lamps. Universal mounting brackets and compact size make for easy installation anywhere. Lamp housing is made of UV stabilized plastic and all hardware is 316 chrome plated stainless steel. Includes 12V, 55W halogen bulb and is 24V, 70W compatible.

| | |
|------------------|-----------------------------------|
| Bulbs: | Replaceable H3 12V 55W/H3 24V 70W |
| Dimensions: | 3.75" H x 3.375" W x 5.5" L |
| Mounting Height: | 4" with bracket |

Flush Mount Deck Lamp

In addition to our highly popular conventional halogen deck lamps, we now offer a flush mount version. Ideally suited for fiberglass hardtop installations and allows for a very clean and finished installation. Free Form lens reflector technology guarantees maximum output. Lamp is completely waterproof and constructed of impact resistant UV stable plastic. Comes complete with 12V 55W halogen H3 bulb. Also suitable for 24V 70W bulbs.

| | |
|-------------|-----------------------------------|
| Bulbs: | Replaceable H3 12V 55W/H3 24V 70W |
| Dimensions: | 3.375" H x 1.5" W x 5.625" L |
| Cutout: | 3" hole |

Part # ML-005NWW

Flush Mount Docking Lights—Convex Lens

Compact flush mount docking lights for a variety of applications. Easy to install through a 2" hole. Ideal for Pontoon and Deck boat docking lamps, spreader lamps or rear docking lamps for motor homes.

Features a high performance convex lens with a 12V 37.5W halogen bulb for optimum performance. Available with and without stainless steel frame. Pigtail required.

| | |
|-----------------|---|
| Bulbs: | Replaceable #893 12V 37.5W Halogen |
| Dimensions: | $\phi = 2-1/2"$ Frame thickness: 7/8" Overall depth: 2-7/8" Mounting depth: 2" |
| Mounting Depth: | 2" |

| | | |

| Part # | WJ-B2005-A-35W |
|---------------|-----------------------|

VENTILATION

Day/Night Solar Vent

96

Day/Night solar vents offer 24 hour ventilation in a compact footprint. The new design can be removed from the deck and features LED lights and additional controls that are accessed from the cabin.

Mini Vent 1000

96

The MiniVent 1000 is the smallest and most economical solar vent in the Marincó line. At just 7" in diameter and approximately 1-3/4" high, the MiniVent 1000 is compact yet effective. This solar powered model is an exhaust vent only.

Air Vent 500 Passive Exhaust Ventilation

97

Marincó® offers the AirVent 500 as a non-solar ventilation option that can passively move 600 to 1,000 cubic feet of air per hour in a 15 knot breeze. Marincó's engineering expertise created this vent to be strong, compact and effective.

VENTILATION

Cowl Vents

97

Cowl Vents are available in both low profile and standard height contours. These vents are a perfect air intake supplement to solar ventilation, and are also commonly used as a bilge ventilating system with or without a mechanical blower.

Clam Shell Vents

98

Clam shell vents are ideal for ventilation needs where a taller vent would foul lines or restrict crew movement. These vents work well as stern mounted ventilators for engine compartments.

Deck Plates

98

Deck plates are used to attach ventilators to the deck, hatch or hose. These plates create a clean installation and can be used with multiple material thicknesses.

Fans

99

Maringo fans provide cabin comfort by direct wiring into a 12V DC system. Multiple models are available to accommodate different installations.

Properly ventilated vessels provide for a more comfortable environment aboard and eliminates the accumulation of dangerous fumes.

TECH tip

Ventilation Explained

Maintenance Ventilation

In most climates, boats that have been closed for a period of time will become “stuffy.” The temperature differential that develops between the boat cabin and the outdoor environment will cause the humidity level inside the boat cabin to rise. When the humidity level in the closed cabin rises, moisture forms, resulting in mold, mildew and musty air. In these conditions, fabrics, boat electronics and even the boat’s fiberglass structure can be damaged. By consistently replacing trapped, stale air in the closed boat with fresh outside air, the humidity equalizes from inside to outside, resulting in effective maintenance ventilation.

Comfort Ventilation

Combining different types of vents, with one vent providing “intake” air flow while another vent provides “exhaust” air flow, creates cross-flow ventilation. A cross-flow ventilation system will make the interior cabin more comfortable and pleasurable because air is constantly moving throughout the cabin. No matter what your boat size or cabin configuration is, you can increase your boating enjoyment with the addition of ventilation.

Safety Ventilation

Most boaters are unaware of the hazards that exist in the boating environment. Any number of serious ventilation problems can occur when a boat is left unattended. And even if you are underway, these problems don’t go away. Fumes and gasses, ranging from carbon monoxide to hydrogen gas from battery charging, to gasoline, propane or solvents stored below, are unpleasant, and can sometimes be dangerous. Also, any open flame devices in the cabin require proper ventilation. Ventilation helps to eliminate these hazards by providing constant air circulation resulting in effective safety ventilation.

How Much Ventilation Is Required For Your Boat?

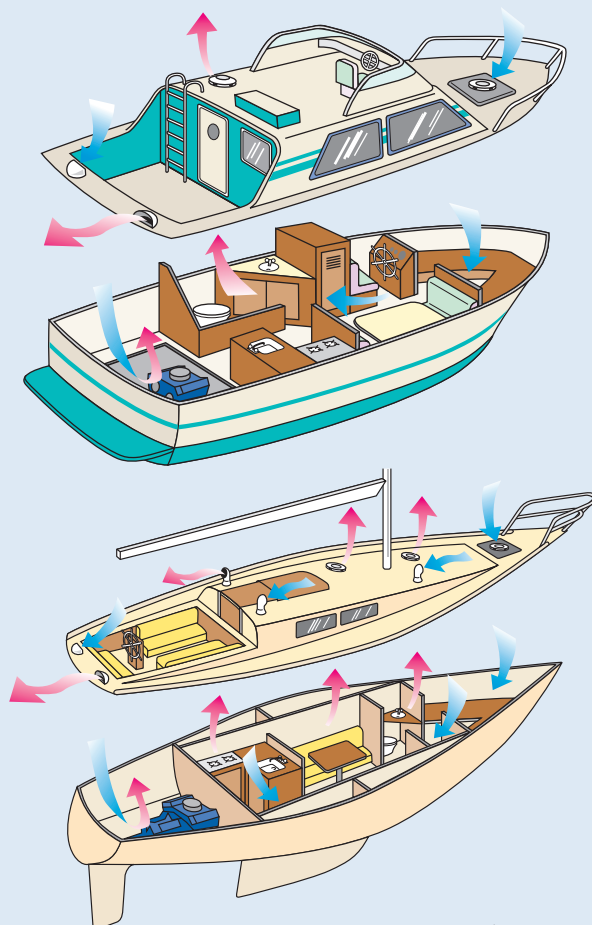

Ideally, the air in the interior of a boat should be circulated once every hour. A typical 30-foot boat contains approximately 800 cubic feet of air. As you will see, our solar powered models can move between 600 and 1,000 cubic feet of air every hour. The general guidelines for providing maintenance ventilation are as follows:

| Boat Size | Recommended Ventilation |
|-------------------|---------------------------------|
| Up to 24 ft. | 1 Exhaust Vent* |
| 24 to 40 ft. | 1 Exhaust Vent & 1 Intake Vent |
| 40 ft. and larger | 2 Exhaust Vents & 1 Intake Vent |

* For effective maintenance ventilation, one vent assumes there will be access for air to get into the cabin (i.e., cowl vent, clamshell vent or louvered panel)

It is important to evaluate the cabin layout of your boat to determine optimal locations for both intake and exhaust ventilation. These illustrations suggest placement for Marincos® solar powered vents and Marincos® passive vents.

Note how the placement of the vents creates cross flow ventilation.

To specifically calculate your boat’s air volume, use this simple formula:

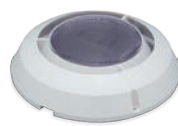

$$A \times B \times C \times 70\% = \text{Boat Interior Volume}$$

A Dimension is the interior length (excluding cockpit)

B Dimension is the boat width

C Dimension is the average interior height

Ventilation Selection Chart

| | Airflow Size | Hole Size Diameter | Deck Plate | Mounting Flange Depth | Operation | | Cubic Feet of Air | Intake | Exhaust |
|--|--------------|--------------------|--------------------------------|-----------------------|--|---|--|--|--|

TECH tip™

Vent Installation Explained

Installation

All Maringo® ventilation products include clear, easy-to-understand installation instructions. These instructions address all of the key factors of a professional installation, such as:

- Proper hole measurement and cutting procedures
- Proper deck plate installation
- Use of sealants to waterproof your vent installation
- Installing vents in hatches
- Installing vents in "cambered" or slightly curved decks
- Use of interior trim rings to "dress up" the cabin

The high quality level of Maringo® Ventilation products must be combined with a sound installation to guarantee that your vent performs in all conditions. Maringo® will make sure that your installation will be easy and successful so that you can enjoy the benefits of installation for a long time to come.

Maringo® Ventilation Installation Systems

Snap-In Deck Plate Installation

The 12 volt vent, 12 volt combo vent and cowl vents use the Maringo® Snap-In deck plate system. The snap-in system allows the easy exchange of any snap-in part for upgrading or convenience, as well as the use of a snap-in cover that completely seals the deck plate making it water tight.

Direct-To-Deck Installation

The Day/Night Plus, MiniVent 1000 and AirVent 500 are designed to be installed directly to the deck without the requirement for a deck plate.

All of these vent systems have built-in shut-off dampers that operate from below.

Day/Night Solar Vent **NEW**

- Circulates fresh air in boat cabin eliminating mold, mildew and musty air
- Moves 1,000 cubic feet of air/hour or 24,000 cubic feet of air/day (4" model)
- Rechargeable battery allows for 24-hour continuous operation
- Whisper quiet fan operation
- No wiring required
- Built-in on/off fan switch, LED lights and intake/exhaust switch
- High capacity NiMh battery operates vent for up to 24-hours without sunlight on a full charge
- Threads into included deck plate and can be removed from outside without tools
- Complete air and green water shut-off from below
- All Day/Night Plus models come complete with white plastic interior trim ring, insect screen, mounting hardware and an easy-to-understand installation manual
- **Replaces NICRO 3" & 4" snap-in deck plates (fits existing holes once snap-in deck plates are removed)**

Replacement NiMh Batteries for **NEW** Day/Night Vents

Day/Night Replacement Metal Hydride Battery

- High capacity battery pack
- 4.8 volts, 2.5 amp-hours
- Replacement battery pack for current Day/Night Vents

Part # N20890

Day/Night Plus Replacement Metal Hydride Battery

- High capacity C-cell battery
- 1.2 volts, 2.0 amp-hours
- Replacement battery for older Day/Night Plus Vents, as well as, older model PowerVent 3000 and Day/Night 2000 Vents

Part # N20790

Day/Night Plus Vent Overhaul Kits

- Includes: motor, intake and exhaust fans, o-ring, insect screen and fasteners for vents

| | | |
|--------|--------|--------------|
| Part # | 202430 | for 3" vents |
| Part # | 202431 | for 4" vents |

Day/Night Plus Gasket Kit

- Includes gaskets and fasteners for both 3" and 4" vents

Part # 202432

Mini Vent 1000

The MiniVent 1000 is the smallest and most economical solar vent in the Maringo® line. At just 7" in diameter and approximately 1-3/4" high, the MiniVent 1000 is compact yet effective. This solar powered model is an exhaust vent only. It will keep the boat cabin cool when you need it most, during the hot sunlight hours. Under solar power, the Mini Vent 1000 will move 700 cubic feet of air an hour. At night, even a light breeze will continue to ventilate the boat passively.

Built-in shut-off damper prevents water intrusion in rough seas. Fits a 3-3/4" diameter installation hole. The vent can be retrofitted to an existing hole of up to 6" in diameter. Available in white ABS plastic or stainless steel. Optional stainless steel cover is also available separately.

- Solar powered exhaust ventilation during daylight and passive exhaust at night
- No batteries or wiring required
- Whisper-quiet fan operation
- Durable white ABS construction
- Shut-off damper to prevent water intrusion in rough seas
- Dimensions: 7" diameter X 1-3/4" high
- All MiniVent 1000 models come complete with white plastic interior trim ring, mounting hardware and an easy-to-understand installation manual

2 YEAR WARRANTY

Air Vent 500 Passive Exhaust Ventilation

Marinco® offers the AirVent 500 as a non-solar ventilation option that can passively move 600 to 1,000 cubic feet of air per hour in a 15 knot breeze. Marinco®'s engineering expertise created this vent to be strong, compact and effective. The AirVent 500 is an economical way to provide ventilation in your boat or it can be used in conjunction with other solar powered or 12V vents to create cross flow air circulation.

- Compact size: 7" diameter x 1-3/4" high
- High Air Flow volume 1,000 cu. ft./hour in a 15 knot breeze
- Strong U.V. stabilized white ABS construction
- Center panel is translucent plastic allowing light to pass through it below deck
- Center damper shuts vent off from below
- Easy installation – attaches directly to deck in compact 3-3/4" diameter hole and can be retrofitted to an existing hole of up to 6" in diameter

Part # N28810

2 YEAR
WARRANTY

Cowl Vents

Cowl Vents are available in both low profile and standard height contours. These vents are a perfect air intake supplement to solar ventilation, and are also commonly used as a bilge ventilating system with or without a mechanical blower. Marinco® was the first supplier of soft, durable PVC vents that are flexible and safe. For interchangeability, Marinco® 4" cowl vent models fit into the same 4" Snap-In deck plates used by the Combo and 12V vents (3" or 4" sizes).

- Soft and durable PVC construction returns to original shape if stepped on
- Safer than metal cowl vents – prevents injury and resists snagging lines
- Snap-In vents include deck plate and cover
- 4" models interchangeable with Marinco® Combo and 12V Vent 4" snap-in deck plates
- Marinco® adapter accessories make installing below-deck duct hose easy

Snap-In Deluxe Low Profile PVC Cowl Vent

- White with bright red interior
- Available in 3" or 4" sizes
- 3" size measures 4-1/2" high
- 4" size measures 5-1/2" high
- Includes white Snap-In deck plate and cover

3" Part # N10863

4" Part # N10864

Snap-In Deluxe Standard PVC Cowl Vent

- White with bright red interior
- Available in 3" or 4" sizes
- 3" size measures 8" high
- 4" size measures 10" high
- Includes white Snap-In deck plate and cover

3" Part # N10963

4" Part # N10964

Clam Shell Vents

- Ideal for ventilation needs where a taller vent would foul lines or restrict crew movement
- Work well as stern mounted ventilators for engine compartment
- Can be used for cabin ventilation with dorade boxes
- Flexible PVC construction
- Small clam shell dimensions: 2-1/2" H x 4-1/2" W x 5" L
- Large clam shell dimensions: 3" H x 5-3/8" W x 6-3/4" L

Small Part # N10873

Large Part # N10874

White Snap-In Deck Plate

- Includes Snap-In watertight cover
- Use with any Marinco® Snap-In vent system
- N10863DW requires a 3-3/4" diameter hole cutout
- N10864DW requires a 4-3/4" diameter hole cutout

3" Part # N10863DW

4" Part # N10864DW

Plastic Interior Trim Ring

- Finishes off interior installation of vent
- Can be installed in decks between 1" and 2" thick
- Available in 3" and 4" sizes
- White plastic construction
- **Note: Interior trim rings are not compatible with threaded deck plates**

3" Part # N10866

4" Part # N10867

Thru Bulkhead Hose Adapter

- For termination attachment of hose to bulkhead
- For attaching hose to cowl vent
- Can be used with Snap-In or threaded deck plates
- For use in decks or bulk heads of more than 1" thick

3" Part # N10869

4" Part # N10870

1 YEAR
WARRANTY

Marine Fan

- 120° adjustable oscillating fan
- Can be set for stationary operation
- Mount on wall, ceiling or dash
- Built-in on/off switch
- Installation hardware included
- 12 volt DC operation, 1.2 amp draw
- Translucent fan blades
- 7.5" vinyl-coated fan guard
- Mounting base dimensions: 3.375" L x 1.5" W
- Stands 8" from mounting surface

Part # 900

1 YEAR
WARRANTY

Folding Fan

- Fan folds out of the way when not in use
- Rotating louver directs air flow
- Mount on wall, ceiling or dash
- Built-in on/off switch
- Installation hardware included
- 12 volt DC operation, .8 amp draw
- Dimensions: 6.75" W x 5.06" H x 1.93" D

Part # 902

1 YEAR
WARRANTY

Personal Fan

- 180° adjustable swivel fan
- Mount on wall, ceiling or dash
- Built-in on/off switch
- Installation hardware included
- 12 volt DC operation
- Compact design installs anywhere
- Great for windshield defogging
- Base Dimensions: 3" diameter
- Stands 5" from mounting surface

Part # 903-5

Ingress Protection (IP) Ratings Guide

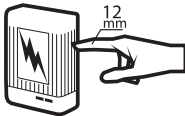

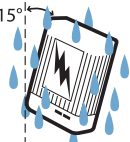

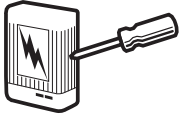

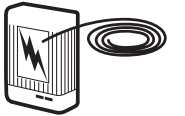

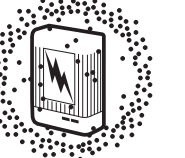

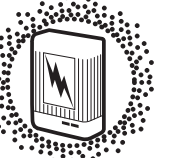

Example:

An IP65 rating can be determined using the adjacent table and example:

- The first number of the rating example, 6, in the gray column means the enclosure is dust tight
- The second number of the rating example, 5, in the blue column means the enclosure is protected against jets of water

The IP rating system was established by the International Electrotechnical Commission (IEC), an organization for international standards and conformity assessment. The IEC collaborates closely with the International Organization for Standardization (ISO). A complete description of the IP ratings and associated tests is found in IEC Publication 529. Although these ratings were initially developed as a way to classify enclosures, they now provide a convenient, practical way to compare levels of sealing. Many electrical products have an Ingress Protection (IP) rating which identifies the environmental factors needing consideration prior to the product's installation.

This is important when deciding when to mount products in a dry and clean environment versus a wet and/or dusty environment. The IP rating indicates the degree of protection provided. The numbers following IP represent levels of sealing and can range from no protection to full protection against dust and water. The table provides a description of the protection at each level.

| SOLIDS | | WATER | |
|--------|---|-------|--|
| 1 |  Protected against a solid object greater than 50 mm such as a hand. | 1 |  Protected against vertically falling drops of water. Limited ingress permitted. |
| 2 |  Protected against a solid object greater than 12 mm such as a finger. | 2 |  Protected against vertically falling drops of water with enclosure tilted up to 15 degrees from the vertical. Limited ingress permitted. |
| 3 |  Protected against a solid object greater than 2.5 mm such as a screwdriver. | 3 |  Protected against sprays of water up to 60 degrees from the vertical. Limited ingress permitted for three minutes. |
| 4 |  Protected against a solid object greater than 1 mm such as a wire. | 4 |  Protected against water splashed from all directions. Limited ingress permitted. |
| 5 |  Dust Protected. Limited ingress of dust permitted. Will not interfere with operation of the equipment. Two to eight hours. | 5 |  Protected against jets of water. Limited ingress permitted. |
| 6 |  Dust tight. No ingress of dust. Two to eight hours. | 6 |  Water from heavy seas or water projected in powerful jets shall not enter the enclosure in harmful quantities. |
| | | 7 |  Protection against the effects of immersion in water between 15 cm and 1 m for 30 minutes. |
| | | 8 |  Protection against the effects of immersion in water under pressure for long periods. |
