ONTARIO KNIFE CO™

▷ CARTER TRINITY

The third collaboration between Ontario Knife Company and Robert Carter may be the best one yet. The titanium and G10 handle is durable and unique, and the smaller size makes the Trinity an even more convenient carry than its big brothers. The Carter Series truly embodies the utility needed for a knife to be an everyday carry.

ONTARIO KNIFE COTM

Founded in Upstate New York in 1889, Ontario Knife Company has been manufacturing knives and tools in the United States for 129 years, operating today out of the small town of Franklinville, New York. OKC has been a major supplier to the United States military for over 75 years, starting during World War II with the 1-18" machete, and continues that legacy today with 54 active NSNs. Because our military has deployed in every environment, our knives are versatile equipment for tactical units and outdoorsmen alike.

In addition to our military pedigree, OKC is a full service cutlery manufacturer, with knives and tools for use around the home, garden, and work. The Old Hickory line of kitchen knives has been in constant production since 1924, and includes some of Ontario Knife Company's most beloved products to this day. OKC has also been making our line of Industrial and Agricultural (I&A) knives for decades, and has recently expanded both offerings to include plastic handles and stainless steel. The updated ChromaticsTM, Agilite[®], and Stainless I&A lines are modern examples of the work we've been doing throughout our history.

First responders will also find that OKC makes a wide range of tools to help them do what they do best – save lives. The most recent addition to our Fire, Law Enforcement, EMS, and Trainers (F.L.E.E.T.) program is the patent-pending Fire SPAX[®], a combination fire ax, hydrant wrench, and halligan bar designed to be a lightweight, low-cost three-in-one tool that should be in every first responder's kit.

In 2018, Ontario Knife Company will continue debuting new products that are high quality, low cost, and in most cases, Made in the USA. We will continue manufacturing the high quality that has been associated with the Ontario Knife Company for generations, and we will continue to produce The Knife You Need When You Need a Knife[®].

...THIS IS WHO WE ARE

\\\\\\\\ SINCE 1889

“WE WILL CONTINUE MANUFACTURING THE HIGH QUALITY THAT HAS BEEN ASSOCIATED WITH THE ONTARIO KNIFE COMPANY FOR GENERATIONS”

-DREW YATES

HEAD OF SALES & MARKETING

▶ ROBERT CARTER *SERIES*

OKC's collaboration with Robert Carter started with the Carter Prime and continues with the Carter 2quared and Carter Trinity. All three knives feature D2 blades and titanium handles, with the Trinity featuring a beautifully contrasted G10 handle scale. Each knife is designed to be a durable and versatile every day carry that makes you better prepared to get any job done.

I&A SERIES

Ontario Knife Company's industrial and agricultural knives have developed over the years to include a wide variety of products based on evolving customer demands. These fruit, vegetable, field, harvesting, table and construction knives feature either a high carbon steel blade with hardwood handles or a stainless blade and a molded plastic handle. These versatile, all-purpose knives may be used to multi-task harvesting, digging and industrial cutting applications.

OLD HICKORY® SERIES

First Introduced in 1924, the Old Hickory knives are the most venerable product line still in active production. The Old Hickory knives feature a hardwood handle secured with brass compression rivets to high carbon steel blades that are both very sharp and capable of retaining and edge better than most stainless knives. Proudly manufactured with artisan processes for over 90 years, Old Hickory has stood the test of time and is proven to be the best carbon steel kitchen cutlery sold today.

AGILITE® SERIES

The Agilite line was designed to be the most lightweight, durable, ergonomic, and advanced cutlery produced by Ontario Knife Company. Engineered down to the edge geometries by blade-master Dan Maragni, the Agilite knives are technically superior to almost any cutlery in the market. Featuring double injection heat resistant molded handles and Sandvik 14C28N™ fine carbide steel, the Agilite knives define premium cutlery. However, true to form for OKC products, they are affordably priced.
