

» **How many watts is this system**

Feb 11, 2014

300 Watts L/R Channel (4 Ohm) 50W for Center, Surround L and Surround R(4 Ohm).

» **Pairing bt**

Jun 09, 2015

Press the B+T button on the unit to put it into BT mode, then activate BT on your phone and search for the device in your phones BT pairing menu screen device name should show its model number PT588AB press it to pair it may prompt you for a passcode if it does enter 0000 on your phone

» **It was working with radio and BT and dvd but we cant make it work on TV?optical cable already plugin in.**

Jun 12, 2015

Please make sure the source audio from your TV is set as linear PCM, not Dolby. If the DVD or audio source is set to dolby it will not work properly.

» **If the TV signal is not in surround sound, Will I still have all five speakers and the woofer put outsound or only the two front speakers will work?**

Apr 01, 2019

Yes, it will work but you have to use the HDMI input channel. And the TV needs to have an HDMI (ARC).
