Versatile Home Receiver

The Pyle Home PT588AB is the newest home theater receiver from Pyle Home. It's equipped with 5.1 channels of audio output for rich, enveloping sound during movies, television, sports events, and your favorite video games. Share an equal visual experience when you connect your high definition or 3D TV to this home receiver. Upgrade your entertainment system and do more with the PT588AB!

Hi-Tech Capabilities

This unit is built with cutting edge-technology to meet any of your entertainment needs. 4 HDMI outputs and 3D pass-through technology makes this receiver ready for just about any modern device. 3 total microphone jacks-- 2 located conveniently on the face of the unit and 1 rear jack. Pre-out connectors allow you to connect an external amplifier to power speakers in your home theatre system, along with a subwoofer output to add

some bass. Connect your video game systems like your Playstation and Xbox, or plug in CD players, recorders, and tape decks-- not to mention your surround sound speakers!

Experience 3D TV

The receiver can be programmed so it doesn't touch the pristine 3D Blu-ray video quality and simply passes it through to the video display. This unit will ensure your 3D experience will keep you on the edge of your seat.

Perfect for the Party

Kick-start the fun and do some karaoke. Use the microphone inputs with treble, bass, delay, and echo controls to sing over your music and get the party started.

Customize and Control

The control center on the face of this home receiver allows you to do everything from switch between your different HDMI connections and inputs, to B/Tooth wireless pairing, manage and adjust your microphones, set and search through radio stations, and of course the ability to tailor your own listening experience with treble and bass controls.

B/Tooth Wireless Capable

Enjoy wireless and hassle-free entertainment when you connect your MP3 player or smart phone to the built-in B/Tooth Wireless audio receiver. Instantly stream your music from libraries and services like Pandora, Slacker Radio, or iTunes just to name a few.

Built-in Safety

Over current, short circuit, and over voltage circuitry protects your equipment from electrical damage.

Additional Features

- VFD Display
- 4 HDMI Inputs, 1 HDMI Output
- Dimensions (WxDxH): 16.9" x 13.0" x 4.92"
- AM/FM Radio with 12 Presets and Included Loop Antenna
- One Key Switch Function Between HDMI Receiver and HDMI Switcher

About Pyle Home

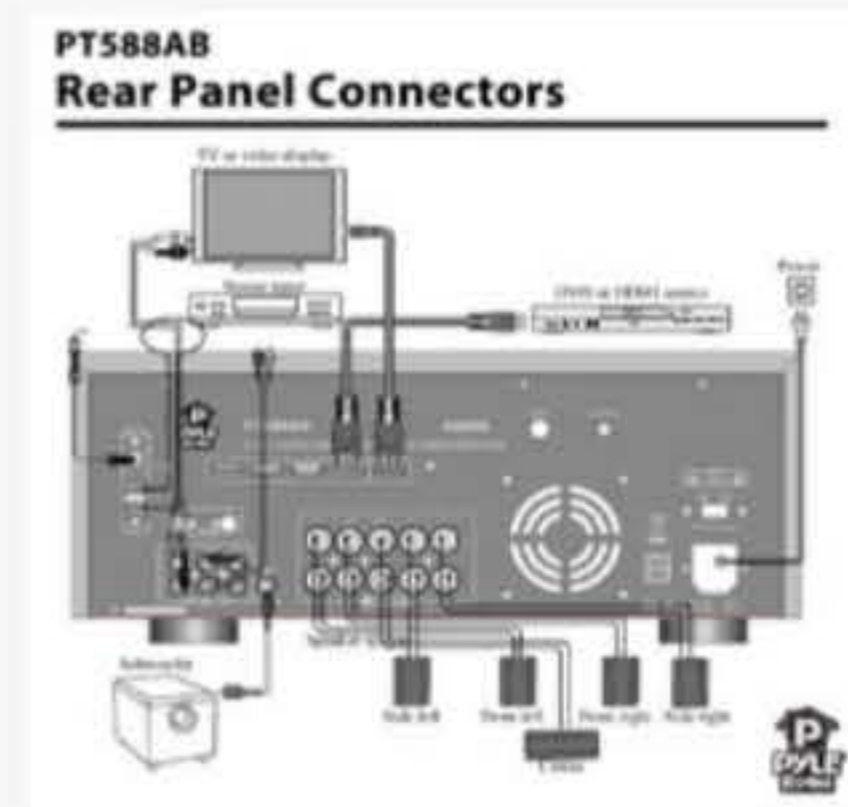

The Pyle Home line includes a wealth of products and accessories designed to enrich your media experiences at home and on the go. Start with your home theater, a stalwart of any modern house. Pyle has projectors, TVs, mounts, and stands, just to get started--all fully equipped with state-of-the-art HD technology and compatible with next-generation video game consoles like Xbox 360, PlayStation 3, and Wii, as well as your favorite Blu-ray players, for crisp, hi-res images that explode in your eye. Of course, Pyle Home also carries all the cables and adapters you need for a fully operational setup that's sure to be the envy of your neighbors.

There's plenty more to keep you entertained in the Pyle Home line. Accessories for your iPod like bass-expanding mini speakers that run on rechargeable batteries and play your digital music, wherever you go. Perfect for the dorm room or sitting by the pool. Pyle also has an impressive line of headphones. Vintage turntables that get the look of yesterday's classic phonographs with today's high-quality manufacturing standards. Power amplifiers, horn speakers, and waterproof speakers for your garden. Not to mention, tripods and speaker stands. Pyle Home has it all.
