## In-Wall A/B Source Selector Switch

The PVCS2 is an in-wall A/B speaker selector switch that installs in a junction box, just like a light switch. This switch makes it simple and easy to direct your home amplifier's audio to two sets of speakers, such as one set indoors and one set outdoors. Activating or deactivating the A speakers, B speakers, is as easy as a push of a button. Easy button operation makes operation a breeze. The included Decora-style wall plate means this switch will unobtrusively blend into your wall. Up to 120 watt power load handling.

Add Versatility to Your Entertainment System

## About Pyle Home

The Pyle Home line includes a wealth of products and accessories designed to enrich your media experiences at home and on the go. Start with your home theater, a stalwart of any modern house. Pyle has projectors, TVs, mounts, and stands, just to get started--all fully equipped with state-of-the-art HD technology and compatible with next-generation video game consoles like Xbox 360, PlayStation 3, and Wii, as well as your favorite Blu-ray players, for crisp, hi-res images that explode in your eye. Of course, Pyle Home also carries all the cables and adapters you need for a fully operational setup that's sure to be the envy of your neighbors.

There's plenty more to keep you entertained in the Pyle Home line. Accessories for your iPod like bass-expanding mini speakers that run on rechargeable batteries and play your digital music, wherever you go. Perfect for the dorm room or sitting by the pool. Pyle also has an impressive line of headphones. Vintage turntables that get the look of yesterday's classic phonographs with today's high-quality manufacturing standards. Power amplifiers, horn speakers, and waterproof speakers for your garden. Not to mention, tripods and speaker stands. Pyle Home has it all.
