For propane gas water heaters, change "N" to "P". For example: 6 30 NOCS would become 6 30 POCS.

†For complete information consult written warranty. \*Not available in propane gas. ‡Some propane gas models have slightly lower inputs than natural gas models, which may reduce First Hour Rating and recovery by up to 3 gallons on propane models.

Models shipped from the factory with an insulation blanket have a "B" as the second to last character in the model number. For example: 6 30 NORBT or 6 40 NBRBS. Not all models have derivatives with factory supplied insulation blankets, see section of table above for models available with an insulation blankets.
