

## Tripod Mount TR-1518 FAQs

**Q. Which antennas are compatible with the tripod mount?**

A. The Pathway and Carryout series of antennas are compatible with Model TR-1518 tripod mount. This includes the Pathway X1, Pathway X2, Carryout G2, Carryout G2+, Carryout Anser, Carryout automatic, and Carryout MP1 antennas.

**Q. What is the weight limit of the tripod?**

A. The tripod mount has a maximum weight limit of 20 pounds.

**Q. What is the height adjustment on the tripod?**

A. The tripod can be adjusted between 14.5" and 22".

**Q. What steps must be completed to make the tripod compatible with the Pathway X2 or Carryout Anser?**

A. In order for the Pathway X2 or Carryout Anser to securely fit on the tripod mount, the antenna feet must be installed in the inside holes of the antenna base.

**Q. Which antennas use the locking bolt?**

A. The Carryout automatic and MP1 antennas use the locking bolt with the tripod mount. The locking bolt is not used with the Carryout Anser, Carryout G2, Carryout G2+, Pathway X2, or Pathway X1 antenna.
